प्रस्तावना

राष्ट्रीय सांख्यिकी कार्यालय (एनएसओ) श्रमबल आंकड़ों की समय समय पर लगातार उपलब्धता के महत्व पर विचार करते हुए 2017 से आवधिक श्रमबल सर्वेक्षण (पीएलएफएस) करता आ रहा है। यह सर्वेक्षण भारत में रोजगार एवं बेरोजगारी की स्थिति पर आंकड़ों का प्राथमिक स्रोत है। इन आंकड़ों का उपयोग योजना, नीति निर्माण, निर्णय समर्थन और सांख्यिकीय विश्लेषण के लिए सरकार के विविध विभागों, मंत्रालयों, अन्य संगठनों, शिक्षाविदों, शोधकर्त्ताओं और विद्वानों द्वारा किया जाता है।

पीएलएफएस की आधार पर सात वार्षिक रिपोर्ट तैयार की गई है जो सर्वेक्षण अवधि जुलाई 2017 – जून 2018 से जुलाई 2023 – जून 2024 पर आधारित है | यह रिपोर्ट, एनएसओ द्वारा जारी की जा रही वार्षिक रिपोर्टों की शृंखला में पहली रिपोर्ट है, जो कैलेंडर वर्ष (जनवरी 2025 - दिसंबर 2025) के दौरान किए गए सर्वेक्षण पर आधारित है। यह रिपोर्ट ग्रामीण एवं नगरीय दोनो क्षेत्रों में रोजगार एवं बेरोजगारी संकेतकों के विविध प्राक्कलन जैसे लिंग, आयु आदि विभिन्न स्तर पर उपलब्ध कराती है।

पीएलएफएस के लिए सर्वेक्षण कार्यविधि का विकास, आँकड़ा विधायन और सारणीयन कार्य, और साथ ही इस रिपोर्ट की प्रस्तुती भी घरेलू सर्वेक्षण प्रभाग (एचएसडी) द्वारा की गई है। क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा इस सर्वेक्षण का क्षेत्र कार्य किया गया। समन्वय एवं गुणवत्ता नियंत्रण प्रभाग (सीक्यूसीडी) ने सर्वेक्षण से सम्बन्धित विविध गतिविधियों का समन्वय किया।

आवधिक श्रमबल सर्वेक्षण के विभिन्न चरणों में उनके बहुमूल्य मार्ग दर्शन के लिए मैं राष्ट्रीय सांख्यिकी आयोग (रा.सां.स.), एनएसएस सर्वेक्षणों पर संचालन समिति की तथा एनएसओ के घरेलू सर्वेक्षणों के लिए तकनीकी सलाहकार समूह (टीएजी) के सदस्यों की बहुत आभारी हूँ। मैं एनएसओ के विभिन्न प्रभागों के अधिकारियों एवं कर्मचारीयों की सराहना करती हूँ जो की इस रिपोर्ट को तैयार करने में शामिल थे।

मैं आशा करती हूँ कि यह रिपोर्ट योजनाकारों, नीति निर्माताओं, शिक्षाविदों, एवं शोधकर्त्ताओं द्वारा उपयोगी पायी जायगी।

महानिदेशक (एन एस एस)

Preface

Considering the importance of availability of labour force data at more frequent time intervals, National Statistics Office (NSO) has been conducting the Periodic Labour Force Survey (PLFS) since 2017. The PLFS is the primary source of data on employment and unemployment situation in India. Data from PLFS are being used for planning, policy formulation, decision support and as input for further statistical exercises by various Departments and Ministries of the Government, other organisations, academicians, researchers and scholars.

Seven Annual Reports of PLFS corresponding the periods July 2017- June 2018 to July 2023 - June 2024 have been released. The present Report is the first in the series of Annual Report being brought out by NSO based on the survey conducted during the calendar year (January 2025 - December 2025). This Report provides estimates of employment and unemployment indicators in both rural and urban areas with different levels of disaggregation like gender, age, etc.

The Household Survey Division (HSD) has developed the survey methodology, carried out data processing and tabulation work for PLFS and also prepared this Report. The field work of the survey has been carried out by the Field Operations Division (FOD). The Coordination and Quality Control Division (CQCD) coordinated various activities pertaining to the survey.

I am highly thankful to the members of the National Statistical Commission (NSC), the Steering Committee on NSS surveys and the Technical Advisory Group (TAG) for Household Surveys of NSO for their valuable guidance at various stages of Periodic Labour Force Survey. I also place on record my appreciation of efforts made by officers and officials of different Divisions of the NSO involved in the preparation of this Report.

I hope this Report will be found useful by planners, policy makers, academicians and researchers, etc.

Director General
National Sample Survey

Ministry of Statistics and Programme Implementation

Labour force estimates obtained from previous PLFS and quinquennial rounds

Explanatory Note

1. Till 2024, the Periodic Labour Force Survey (PLFS) was carried out with two major objectives for the measurement of employment and unemployment. The first was to measure the dynamics in labour force participation and employment status in the short time interval of three months for only the urban areas in the Current Weekly Status (CWS). The second one was, for both rural and urban areas, to measure the labour force estimates on key parameters in both usual status (ps+ss) and CWS annually. To achieve these twin objectives, as well as providing estimates on additional aspects of data (such as hours worked) which were not available from the quinquennial rounds of NSO, certain changes were introduced in the sampling design and structure of the Schedule of inquiry. These changes are annexed in the first Annual Report on Periodic Labour Force Survey (PLFS), (July 2017 - June 2018): https://www.mospi.gov.in/sites/default/files/publication_reports/Annual%20Report%2C%20PLFS%202017-18_31052019.pdf

2. Considering the need for the generation of high-frequency labour force indicators with enhanced coverage, the sampling methodology of the Periodic Labour Force Survey (PLFS) was revamped from January 2025. The revamped PLFS design is envisaged to address three major objectives for the measurement of employment and unemployment, namely (i) to estimate the key employment and unemployment indicators on a monthly basis for rural and urban areas in the CWS at all India level, (ii) to extend the coverage of the Quarterly results of PLFS to rural areas and thereby producing quarterly estimates covering both rural and urban areas of India in the CWS and (iii) to estimate important employment and unemployment indicators in both usual status (ps+ss) and CWS for rural and urban areas annually. In addition, some changes have also been incorporated in the structure of the Schedule of inquiry. The details of the revamped PLFS sample design and changes made in the Schedule of inquiry have been provided in the PLFS release titled ***PLFS: Changes in 2025*** *(https://www.mospi.gov.in/sites/default/files/publication_reports/PLFS_Changes-in-2025_rev.pdf)*. Consequent to the changes, the PLFS survey period has been shifted from the usual July-June cycle to January-December cycle, with effect from 2025.

3. The users of this report are being apprised of the various aspects of the survey methodology, data collection mechanism and sampling design of PLFS vis-à-vis the Employment and Unemployment quinquennial rounds of NSS (2011-12 and earlier years) so that these can be considered while comparing results from employment and unemployment surveys (2011-12 and earlier years) which were undertaken along with the NSS Consumer Expenditure Surveys. Further, the users of this report need to consider the changes implemented in PLFS from January 2025 while comparing the current results with estimates released in PLFS publications up to 2024. The results of the PLFS thus need to be understood and used in the context in which the survey methodology and sample selection have been designed.

मुख्य बातें

आवधिक श्रमबल सर्वेक्षण (पीएलएफएस) 2025

सर्वेक्षण अवधि

जनवरी 2025 से दिसंबर 2025

सर्वेक्षण कवरेज

सर्वेक्षण किया गया

22,594 फर्स्ट स्टेज उनिट्स (एफएसयु)	ग्रामीण: 12,441 गांवों नगरीय: 10,153 नगरीय खंडो
2,70,472 परिवारों	1,48,718 ग्रामीण क्षेत्रों में 1,21,754 नगरीय क्षेत्रों में
11,48,634 वयक्तियों	6,56,160 ग्रामीण क्षेत्रों में 4,92,474 नगरीय क्षेत्रों में

इस सर्वेक्षण में पूरे भारतीय संघ को शामिल किया गया अंडमान और निकोबार द्वीप समूह के उन गाँवों को छोड़कर जिन तक पहुँच पाना पूरे वर्ष तक बेहद कठिन था।

श्रम बल संकेतक पेश करने के लिए अपनाया गया आधार

श्रम बल संकेतक पेश करने के आधार

सामान्य स्थिति (पीएस+एसएस) सन्दर्भ अबधि: 1 वर्ष	वर्तमान साप्ताहिक स्थिति(सीडब्ल्यूएस) सन्दर्भ अबधि: 1 सप्ताह

अखिल भारतीय स्तर पर जनवरी 2025 - दिसंबर 2025 की अबधि के लिए पीएलएफएस से प्राप्त कुछ मुख्य परिणाम निम्नलिखित हैं ।

(क) श्रमबल सामान्य स्थिति (पीएस+एसएस) में

एलएफपीआर सभी उम्र के व्यक्तियों में

भारत में लेबर फोर्स पार्टिसपैशन रेट (एलएफपीआर) सामान्य स्थिति (पीएस+एसएस) में: 44.9%

ग्रामीण	नगरीय
पुरूषों में: 58.8%	पुरूषों में: 59.7%
महिलाओं में: 34.6%	महिलाओं में: 22.2%

कथन. 2

एलएफपीआर 15-29 वर्ष उम्र के व्यक्तियों में

भारत के 15-29 वर्ष उम्र के व्यक्तियों में सामान्य स्थिति (पीएस+एसएस) में एलएफपीआर: 46.0%

ग्रामीण क्षेत्रों में:	नगरीय क्षेत्रों में:
47.3%	43.1%

कथन. 2

एलएफपीआर 15 वर्ष एवं उससे अधिक उम्र के व्यक्तियों में

भारत के 15 वर्ष एवं उससे अधिक उम्र के व्यक्तियों में सामान्य स्थिति (पीएस+एसएस) में एलएफपीआर: 59.3%

ग्रामीण क्षेत्रों में:	नगरीय क्षेत्रों में:
62.8%	52.2%

कथन. 2

(ख) कार्यबल

डब्ल्यूपीआर सभी उम्र के व्यक्तियों में

कामगार जनसंख्या अनुपात (डब्ल्यूपीआर) सामान्य स्थिति में (पीएस+एसएस) में: 43.5%

ग्रामीण	नगरीय
पुरूषों में: 57.2%	पुरूषों में: 57.2%
महिलाओं में: 33.8%	महिलाओं में: 20.7%

कथन. 5

डब्ल्यूपीआर 15-29 वर्ष उम्र के व्यक्तियों में

15-29 वर्ष उम्र के व्यक्तियों में भारत में डब्ल्यूपीआर सामान्य स्थिति (पीएस+एसएस) में: 41.4%

ग्रामीण क्षेत्रों में:	नगरीय क्षेत्रों में:
43.4%	37.2%

कथन. 5

डब्ल्यूपीआर 15 वर्ष एवं उससे अधिक उम्र के व्यक्तियों में

15 वर्ष एवं उससे अधिक उम्र के व्यक्तियों में भारत में डब्ल्यूपीआर सामान्य स्थिति (पीएस+एसएस) में: 57.4%

ग्रामीण क्षेत्रों में:	नगरीय क्षेत्रों में:
61.2%	49.7%

कथन. 5

सामान्य स्थिति (पीएस+एसएस) में कामगारों के बीच रोजगार स्थिति

सामान्य स्थिति (पीएस+एसएस) में कामगारों के बीच स्व-रोजगार का शेयर(%)

ग्रामीण	ग्रामीण	नगरीय	नगरीय
पुरूषों में: 57.4	महिलाओं में: 70.7	पुरूषों में: 40.4	महिलाओं में: 40.4

सामान्य स्थिति (पीएस+एसएस) में कामगारों के बीच नियमित मजदूर/वेतनभोगी कर्मचारियों का शेयर(%)

ग्रामीण	ग्रामीण	नगरीय	नगरीय
पुरूषों में: 17.0	महिलाओं में: 9.3	पुरूषों में: 46.5	महिलाओं में: 50.9

सामान्य स्थिति (पीएस+एसएस) में कामगारों के बीच आकस्मिक मजदूरों का शेयर(%)

ग्रामीण	ग्रामीण	नगरीय	नगरीय
पुरूषों में: 25.6	महिलाओं में: 20.0	पुरूषों में: 13.1	महिलाओं में: 8.7

कथन.7

(ग) बेरोजगार दर सामान्य स्थिति (पीएस+एसएस) में

बरोजगार दर सभी उम्र के व्यक्तियों पर

भारत में सामान्य स्थिति (पीएस+एसएस) में बरोजगार दर: 3.1%

ग्रामीण	नगरीय
पुरूषों में: 2.6%	पुरूषों में: 4.2%
महिलाओं में: 2.1%	महिलाओं में: 6.4%

कथन.16

बरोजगार दर 15 वर्ष एवं उससे अधिक उम्र के व्यक्तियों पर

भारत में सामान्य स्थिति (पीएस+एसएस) में बरोजगार दर 15 वर्ष एवं उससे अधिक उम्र के व्यक्तियों में: 3.1%

ग्रामीण	नगरीय
पुरूषों में: 2.6%	पुरूषों में: 4.2%
महिलाओं में: 2.1%	महिलाओं में: 6.4%

कथन.17

बरोजगार दर 15 बर्षो और उससे उपर के उम्र के शिक्षित व्यक्तियों में

भारत में 15 बर्षो और उससे उपर के उम्र के शिक्षित (माध्यमिक एवं उसके उच्चतर का अधिकतम शिक्षा का स्तर) व्यक्तियों में सामान्य स्थिति (पीएस+एसएस) में बरोजगार दर: 6.5%

ग्रामीण क्षेत्रों में	नगरीय क्षेत्रों में
6.0%	7.2%

कथन.17

बरोजगार दर युवा (15-29 वर्ष उम्र के) व्यक्तियों में

भारत में बरोजगार दर युवा (15-29 वर्ष उम्र के) व्यक्तियों में: 9.9%

ग्रामीण	नगरीय
पुरूषों में: 8.2% महिलाओं में: 8.6%	पुरूषों में: 11.8% महिलाओं में: 18.9%

कथन.18

HIGHLIGHTS

Periodic Labour Force Survey (PLFS) 2025

Survey Period

January 2025 to December 2025

Survey Coverage

Surveyed

22,594 First Stage Units (FSUs)	Rural: 12,441 villages Urban: 10,153 urban blocks
2,70,472 Households	1,48,718 in rural areas 1,21,754 in urban areas
11,48,634 Persons	6,56,160 in rural areas 4,92,474 in urban areas

The survey covered the whole of the Indian Union *except* the villages in Andaman and Nicobar Islands which remained extremely difficult to access throughout the year.

Approaches for presenting Labour Force Indicators

Approaches followed for presenting Labour Force Indicators

usual status (ps+ss) Reference period: 1 year	current weekly status (CWS) Reference period: 1 week

Some of the key results at the all-India level for the period January 2025 - December 2025 emerging from PLFS are highlighted below.

A. Labour Force in usual status (ps+ss)

LFPR for persons of all ages

Labour Force Participation Rate (LFPR) in usual status (ps+ss) in India: 44.9%

rural	urban
male: 58.8%	male: 59.7%
female: 34.6%	female: 22.2%

Statement 2

LFPR for persons of age 15-29 years

Labour Force Participation Rate (LFPR) in usual status (ps+ss) for persons of age 15-29 years in India: 46.0%

rural:	urban:
47.3%	43.1%

Statement 2

LFPR for persons of age 15 years and above

Labour Force Participation Rate (LFPR) in usual status (ps+ss) for persons of age 15 years and above in India: 59.3%

rural:	urban:
62.8%	52.2%

Statement 2

B. Workforce

WPR in usual status for persons of all ages

Worker Population Ratio (WPR) in usual status (ps+ss) in India: 43.5%

rural	urban
male: 57.2%	male: 57.2%
female: 33.8%	female: 20.7%

Statement 5

WPR in usual status for persons of age 15-29 years

Worker Population Ratio (WPR) in usual status (ps+ss) for persons of age 15-29 years in India: 41.4%

rural:	urban:
43.4%	37.2%

Statement 5

WPR in usual status for persons of age 15 years and above

Worker Population Ratio (WPR) in usual status (ps+ss) for persons of age 15 years and above in India: 57.4%

rural:	urban:
61.2%	49.7%

Statement 5

Status in employment among workers in usual status (ps+ss)

Share (%) of self-employed among workers in usual status (ps+ss)

rural	rural	urban	urban
male: 57.4	female:70.7	male: 40.4	female: 40.4

Share (%) of regular wage/ salaried employees among workers in usual status (ps+ss)

rural	rural	urban	urban
male:17.0	female: 9.3	male: 46.5	female: 50.9

Share (%) of casual labour among workers in usual status (ps+ss)

rural	rural	urban	urban
male: 25.6	female: 20.0	male:13.1	female: 8.7

Statement 7

C. Unemployment Rate in usual status (ps+ss)

Unemployment Rate (UR) in usual status for persons of all ages

Unemployment Rate in usual status (ps+ss) in India: 3.1%

rural	urban
male: 2.6% female: 2.1%	male: 4.2% female: 6.4%

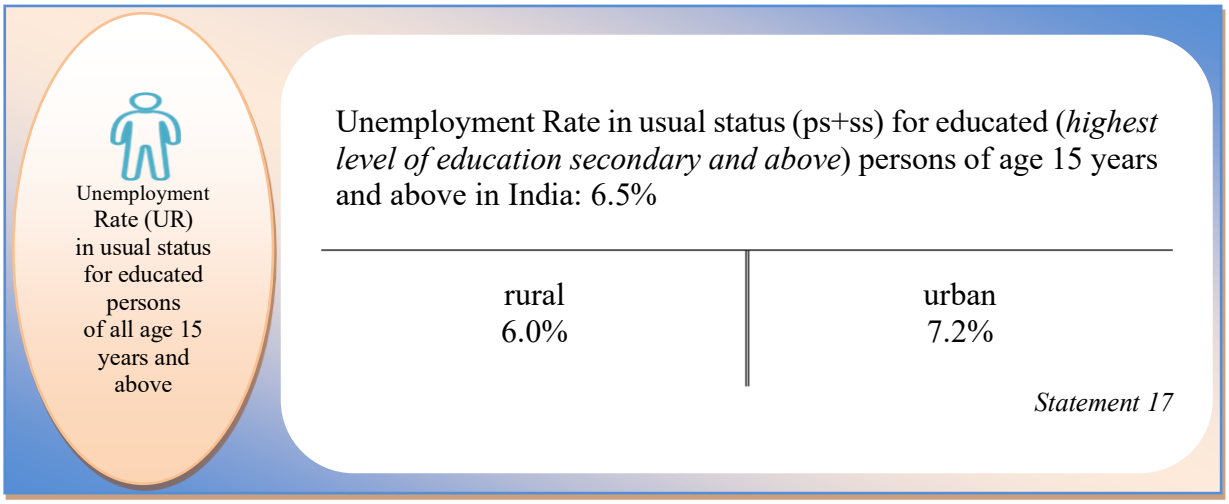
Statement 16

Unemployment Rate (UR) in usual status for persons of age 15 years and above

Unemployment Rate in usual status (ps+ss) for persons of age 15 years and above in India: 3.1%

rural	urban
male: 2.6% female: 2.1%	male: 4.2% female: 6.4%

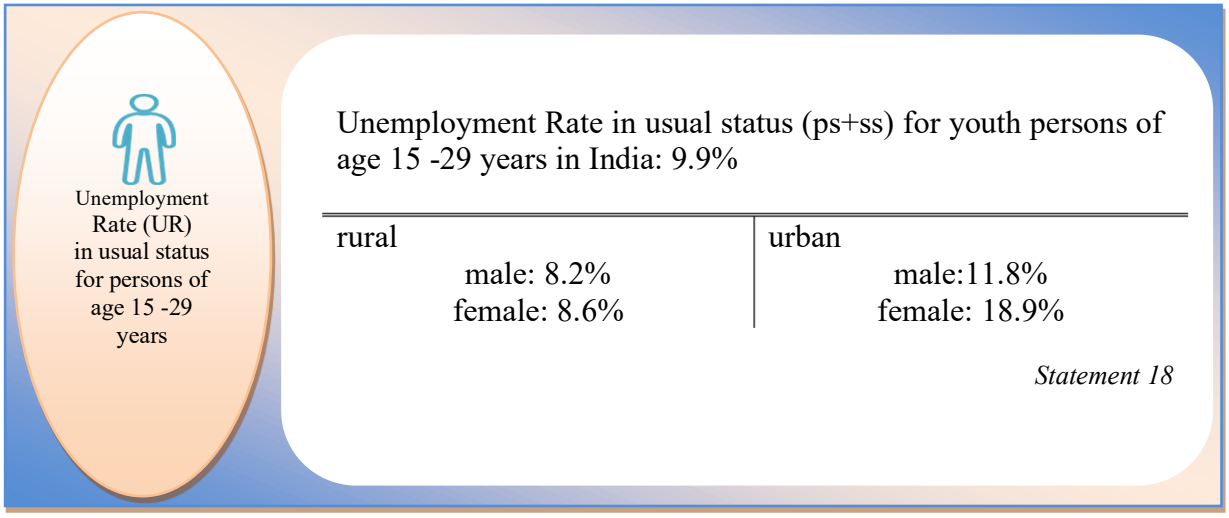
Statement 17



Unemployment Rate in usual status (ps+ss) for educated (*highest level of education secondary and above*) persons of age 15 years and above in India: 6.5%

rural	urban
6.0%	7.2%

Statement 17



Unemployment Rate in usual status (ps+ss) for youth persons of age 15 -29 years in India: 9.9%

rural	urban
male: 8.2% female: 8.6%	male:11.8% female: 18.9%

Statement 18

D. Time Series of Key Labour Force indicators in usual status (ps+ss) obtained from PLFS

Table 1: Labour Force Participation Rate (in per cent) in usual status (ps+ss) estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 for persons of age 15 years and above and persons of all ages

Summary of Findings

Summary of Findings

1.0 Introduction

1.1 Periodic Labour Force Survey (PLFS) of National Statistics Office (NSO)

1.1.1 Considering the importance of availability of labour force data at more frequent time intervals, the National Statistics Office (NSO) launched the Periodic Labour Force Survey (PLFS) in April 2017 with the following objectives:

- to estimate the key employment and unemployment indicators (*viz.* Worker Population Ratio, Labour Force Participation Rate, Unemployment Rate) in the short time interval of three months for the urban areas only in the current weekly status (CWS)
- to estimate employment and unemployment indicators in both usual status (ps+ss) and CWS in both rural and urban areas annually

1.1.2 Seven Annual Reports based on Periodic Labour Force Survey (PLFS) covering both rural and urban areas, giving estimates of all important parameters of employment and unemployment in both usual status (ps+ss) and current weekly status (CWS) have been released. These seven Annual Reports were brought out based on data collected in PLFS during the survey periods July 2017-June 2018, July 2018-June 2019, July 2019-June 2020, July 2020-June 2021, July 2021-June 2022, July 2022-June 2023 and July 2023-June 2024.

1.1.3 However, considering the need to generate high-frequency labour force indicators with enhanced coverage, the sampling methodology of the Periodic Labour Force Survey (PLFS) has been revamped from January 2025. Further, to keep uniformity with the international practice of reporting labour force indicators, the survey period of PLFS has been shifted from the July–June cycle (i.e., agricultural year) to the January–December cycle (i.e., calendar year) from 2025. The revamped PLFS design is envisaged to address the following objectives:

- to estimate the key employment and unemployment indicators (viz. Labour Force Participation Rate, Worker Population Ratio and Unemployment Rate) on a monthly basis for rural and urban areas in the current weekly status (CWS) at all India level
- to extend the coverage of the Quarterly results of PLFS to rural areas and thereby producing quarterly estimates covering both rural and urban areas of India in the current weekly status (CWS)
- to estimate important employment and unemployment indicators in both usual status (ps+ss) and CWS for rural and urban areas annually

1.1.4 Apart from the changes in the PLFS sample design, some additional items of information have also been included in the PLFS first visit and revisit schedules from January 2025 onwards.

1.1.5 Based on the revamped sampling design, the current Annual Report of the Periodic Labour Force Survey is being brought out using data collected during the survey period January–December 2025. In addition, the report provides comparative statements at the all-India level, wherever appropriate, with PLFS calendar year data for 2022, 2023, and 2024. The samples of First Stage Units (FSU) of PLFS canvassed during the period July of one year to June of the next year of 2021-22, 2022-23, 2023-24 and 2024 (July-December) were independently drawn for each quarter before commencement of the survey. Since the quarterly samples were drawn independently, estimates of labour force indicators for a calendar year, i.e., for the period January – December of a specific year, have been obtained by combining the data collected during the four quarters of the calendar year. The estimates for the years 2022, 2023 and 2024 have been generated from the published unit-level data. The calendar year estimates presented here are based on information collected during first visit of PLFS.

1.2 Data reference and survey period of the Annual Report of Periodic Labour Force Survey (PLFS), 2025

1.2.1 The results of the Annual Report of PLFS, 2025 are generated from the data collected during the survey period January - December 2025.

1.2.2 The Statements in this Chapter and Tables (in Appendix A) of this report contain estimates of labour force indicators in *usual status (ps+ss)* and *current weekly status* (CWS). This report also covers some aspects of earnings from employment, hours worked, education and vocational training etc.

1.2.3 Estimates in this report correspond to the data collected in the entire survey period January 2025 to December 2025. The reference period of the estimates of the survey period is the mid-point of the survey period.

1.3 Comparison of results with previous annual reports of PLFS:

1.3.1 Although the key concepts and definitions, measurement framework followed in previous PLFS have remained unchanged, the sample design of the PLFS has been revamped from January 2025. In addition, some changes have also been incorporated into the structure of the Schedule of inquiry. Users of PLFS results need to consider the changes implemented in PLFS from January 2025 while comparing PLFS results with estimates released through PLFS publications up to December, 2024. The results of the PLFS post January 2025 thus need to be understood and used in the context with which the sample selection methodology of PLFS has been designed.

1.4 Modifications in PLFS schedule

1.4.1 The PLFS schedule canvassed during the period January–June 2025 underwent certain modifications, involving addition and deletion of specific items of information to meet the evolving data requirements of various Central Ministries and Departments. These modifications in the Schedule have been undertaken in Block 3 (household characteristics), Block 4 (demographic particulars of household members) and Block 4.1 (formal vocational/ technical training particulars of household members). The modifications in the coverage of the items of information of schedule 10.4 canvassed during January–June 2025, with reference to the schedule canvassed up to December 2024, are summarised in Table 1(a).

Table 1(a): Modifications in the coverage of the items of information of Schedule 10.4 during January-June 2025 with respect to the Schedule 10.4 canvassed up to December 2024

Reference to Schedule	PLFS Schedule canvassed up to December 2024	PLFS Schedule canvassed during January – June 2025
Columns 10 to 14 of Block 4 of Schedule 10.4 (FV & RV)	Column-10, used to collect person-level data on the number of years in formal education for literate persons, has been dropped.	Five new education-related items have been incorporated as Columns 10, 11, 12, 13 and 14 in Block 4. To accommodate these additions, Columns 11 and 12 of the previous Schedule (used up to December 2024) have been renumbered as Columns 15 and 17, respectively.
Column 16 of Block 4 of Schedule 10.4 (FV & RV)	No such item of information was collected.	This column has been introduced in Block 4 of Schedule 10.4 to collect additional information on whether persons, whose general level of education is primary, have attended secondary education.
Column 8 of Block 4.1 of Schedule 10.4 (FV)	No such item of information was collected.	One additional item of information on the nature of the certifying body from which vocational/technical training was received has been added as col 8 in block 4.1 of Schedule 10.4.
Items 6.1 and 6.2 of Block 3 of Schedule 10.4 (FV)	No such item of information was collected.	Two additional questions on land possessed and land leased out by the surveyed household have been added as item 6.1 and item 6.2 in block 3 of Schedule 10.4.
Item 7 (7.1 to 7.5) of Block 3 of Schedule 10.4 (FV)	No such item of information was collected.	Five additional items of information regarding the usual income of the household from renting of land or building, from interest on savings and investment, from pension received, from remittances received and total of item 7.1 to 7.4 have been incorporated as items 7.1 to 7.5 in block 3 of Schedule 10.4.

1.4.2 Some modifications have also been made in the PLFS Schedule 10.4 used for the survey period July-December, 2025. These modifications in the Schedule have been undertaken in Block 4, used for recording Demographic Particulars of Household members and Block 4.1, which is meant to collect information on formal vocational/technical training particulars of household members of age 12 to 59 years. The modifications in the coverage of the items of information of schedule 10.4 canvassed during July-December 2025, with reference to the schedule canvassed during January–June 2025, are summarised in Table 1(b).

Table 1(b): Modifications in the coverage of the items of information of Schedule 10.4 during July-December 2025 with respect to Schedule 10.4 canvassed during January-June 2025

Reference to Schedule	PLFS Schedule canvassed during January-June 2025	PLFS Schedule canvassed during July – December 2025
Columns 15 of Block 4 of Schedule 10.4 (FV & RV)	Person-level data on Column-15 (status of current attendance in educational institution) was collected for persons aged 0 to 29 years.	Person-level data on Column-15 (status of current attendance in educational institution) was collected for persons aged **0 to 59 years**.
Columns 18 of Block 4 of Schedule 10.4 (FV)	No such item of information was collected.	This column has been introduced to collect additional information in Block-4 Schedule 10.4 (FV) for persons of age 12 to 59 years, those who did not receive or receiving any vocational/technical training (i.e. for persons having Code-6 in Column-17 of Block-4), regarding whether they have received or receiving any training or course for entrance in higher education or for employment exams by an institute / training centre. Responses to the question can be recorded as (yes-1, no-2).
Columns 19 of Block 4 of Schedule 10.4 (FV)	No such item of information was collected.	This column has been introduced to collect information regarding the time period when the vocational / technical training or entrance or employment exam related training is / has been completed.
Block Description of Block 4.1 of Schedule 10.4 (FV)	Block description was formal vocational/ technical training particulars of household members of age 12 to 59 years (for those with code 1 in column 17 of Block 4)	Block description has been changed to formal vocational/technical training particulars of household members of age 12 to 59 years (for those with code 1 in column 17 of Block 4) and code ≠ 1 in column 19)
Column-3 of Block-4.1 of Schedule 10.4 (FV)	Whether the training was completed during last 365 days (yes-1, no-2)	This column has been **omitted**.

1.5 Changes in sampling design

1.5.1 To achieve the objectives outlined in paragraph 1.1.3, the sampling design of the PLFS has been revised with effect from January 2025. The revamped design has been introduced to enhance the frequency and representativeness of key labour market indicators. The salient features of the revised sampling design, as adopted from January 2025, are compared with the sampling methodology followed in PLFS up to December 2024, with a summary of key changes presented in Table 2.

Table 2: Comparison of different features between the revamped PLFS sample design adopted from January 2025 and the PLFS sample design used up to December 2024

Aspect of the sample Design	PLFS sample design followed up to December, 2024	Revamped PLFS design adopted from January 2025
Rotational panel	In the rotational panel scheme followed in PLFS up to December 2024, each selected household in urban areas was visited four times, once in each quarter, in the beginning with the first visit schedule [*Sch. 10.4(FV)*] in the first quarter and thrice periodically later with revisit schedule [*Sch. 10.4(RV)*] in the following three quarters. There was no provision for revisits for the rural samples. This rotational panel scheme ensured that 75% matching of the samples surveyed in successive quarters for urban areas.	In the rotational panel scheme adopted in the revamped PLFS sample design employed from January 2025, each selected household is visited four times in four consecutive months, with the first visit schedule [*Sch. 10.4(FV)*] in the first month and other three with the revisit schedule [*Sch. 10.4 (RV)*] in the following three months for both rural and urban areas. This rotational panel scheme ensures a 75% matching of the samples surveyed between two consecutive months for both rural and urban areas and 50% matching in successive quarters.
First (or Primary) Stage units (FSUs) of the multistage design	In the sampling design followed in PLFS up to December 2024, the list of the latest available Urban Frame Survey (UFS) blocks was considered as the urban sampling frame for selection of the First Stage Units. For rural areas, list of 2011 Population Census villages (Panchayat wards for Kerala) along with its subsequent revision constituted the rural sampling frame for selection of the First Stage Units.	With a view to ensure uniformity in the size of First Stage Units and for operational convenience, large census 2011 villages and UFS blocks are notionally divided into smaller units of more or less equal size, known as sub-units, depending on a pre-defined criterion based on population in the village or number of households in the UFS block. In the revamped PLFS design employed from January 2025, the list of Census 2011 villages / sub-units (for those census 2011 villages where sub-units are formed within) together formed the sampling frame for selection of the First Stage Units for rural areas. Likewise, the list of latest available UFS blocks / subunits (for those UFS blocks where sub-units are formed within) together formed the sampling frame for selection of the First Stage Units for urban areas. The Census 2011 frame were updated by removing those villages which are urbanised and included in the latest urban frame survey (UFS) prior to the selection

Table 2: Comparison of different features between the revamped PLFS sample design adopted from January 2025 and the PLFS sample design used up to December 2024		
Aspect of the sample Design	**PLFS sample design followed up to December, 2024**	**Revamped PLFS design adopted from January 2025**
		of the samples.
Stratification of FSUs	In the sampling design employed for PLFS up to December 2024, for rural areas, each NSS region constituted the rural stratum and in urban areas, strata were formed within each NSS region on the basis of the size class of towns as per the Population Census 2011. No provision of special stratum of uninhabited villages was present.	In the revamped PLFS sample design, districts have been made the primary geographical unit, called basic stratum, within a state/UT separately for rural and urban sectors for selecting FSUs for most part of the geography covered. In the remaining parts NSS region has been made the basic stratum. For rural areas, provision for stratification has been made within district / NSS region (as the case may be) based on distance of the villages within 5 Kms from the district headquarters or from a city/town with more than 5 lakh population. In case of urban areas million-plus cities within the district / NSS region have been formed as a stratum. A Special Stratum comprising all the uninhabited villages as per Census 2011, formed at the all-India level, has been incorporated in the revamped PLFS design.
Selection scheme for selecting FSUs	In the sample design followed in PLFS till December 2024, FSUs were selected by Probability Proportional to Size With Replacement (PPSWR) scheme, where size was the population of census villages (Panchayat Ward in case of Kerala) in rural areas and number of households in the UFS block in urban areas. The sample FSUs were drawn from stratum / sub-stratum randomly in the form of two independent sub-samples.	In the revamped PLFS sample design, one FSU from each of the stratum / sub-stratum is selected for each month by Simple Random Sampling (SRS) scheme. No provision of drawing sample in the form of independent sub-samples is present.
Sample Size	The total number of FSUs surveyed was 12,800. Out of these 12,800 FSUs, 7,016 FSUs were surveyed in rural areas and the remaining 5,784 FSUs were covered in the urban areas. From each selected sample FSUs, 8 households were surveyed, which implied an overall sample size of around 1,02,400 households.	In the revamped PLFS sample design, a total sample size of 22,692 FSUs is planned to be surveyed (12,504 FSUs in the rural areas and 10,188 in the urban areas) in each year of the two-year panel. A total of 12 households are surveyed from each of the selected FSUs which implies an overall sample size of around 2,72,304 households. This marks a 2.65 time increase in sample households to be covered in PLFS as compared to the number of sample households surveyed up to December, 2024.

1.6 Sample Size

1.6.1 *Sample Size for First Visit in rural and urban areas:*

1.6.1.1 The sample size in terms of FSUs (census 2011 villages /Urban Frame Survey blocks/ subunits), households and persons surveyed, is given separately for rural areas, urban areas and rural and urban areas combined in Table 3 below for PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025.

Table 3: FSUs, households and persons surveyed in PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

period	rural			urban			rural+urban		
	FSU	households	person	FSU	households	person	FSU	households	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
PLFS 2025	12,441	1,48,718	6,56,160	10,153	1,21,754	4,92,474	22,594	2,70,472	11,48,634
PLFS 2024	6,982	55,846	2,40,492	5,767	46,111	1,75,057	12,749	1,01,957	4,15,549
PLFS 2023	6,958	55,651	2,42,008	5,726	45,779	1,74,324	12,684	1,01,430	4,16,332
PLFS 2022	7,003	56,015	2,47,005	5,758	46,015	1,77,921	12,761	1,02,030	4,24,926

1.6.1.2 Among the persons surveyed, total number of persons of age 15 years and above for PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 is presented in Table 4.

Table 4: Number of persons of age 15 years and above in the sample in PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

period	PLFS 2022	PLFS 2023	PLFS 2024	PLFS 2025
(1)	(2)	(3)	(4)	(5)
rural	1,83,482	1,80,287	1,79,460	4,96,186
urban	1,40,702	1,38,064	1,38,884	3,95,080
rural+urban	3,24,184	3,18,351	3,18,344	8,91,266

1.6.1.3 In PLFS, the information on gender is collected in a disaggregated manner, with categories of male, female and transgender. At the all-India level, a total of 37 samples pertaining to transgender persons were covered in PLFS 2025 and relevant information as per the schedule of enquiry was collected from them. For the purpose of analysis and presentation, the transgender category has been subsumed under the overall 'persons' category. Similarly, the number of transgender persons surveyed during PLFS 2022, PLFS 2023 and PLFS 2024 were 13, 16 and 15, respectively. However, unlike the approach adopted in PLFS 2025, transgender persons were included under the gender category 'male' in PLFS 2022, PLFS 2023 and PLFS 2024.

1.7 Contents of the report

1.7.1 This report contains the present chapter and six appendices. The detailed tables forming the basis of this report are presented in Appendix A. The RSEs of key estimates are presented in Appendix B. In Appendix C, the concepts and definitions of important terms used in the survey in connection with the various items covered in this report are presented. Appendix D gives a detailed description of the sample design and estimation procedure used for the survey. Appendices E1 and E2 give the facsimile of the Schedules

(Schedule 10.4) canvassed during the survey period January-June 2025 and July-December 2025, respectively.

1.7.2 In the Report, the key indicators of employment and unemployment among persons belonging to different social groups (viz., *scheduled tribe*, *scheduled caste*, *other backward class* and the rest referred to as *others*) and for major religious groups (*Hinduism, Islam, Christianity and Sikhism)* are presented. It may be noted that the scope of the survey being all households without a special focus on social groups or religious groups, sample design was not tailored to specifically net the social groups/religious groups. Thus, sample size for the social groups or religious groups in different States/UTs may not be enough to provide sufficiently reliable estimates of the various indicators and therefore, the estimates for the social groups and religious groups are not presented for different States/UTs in the Report.

1.7.3 If there are no sample households/persons in a particular category, the estimates/estimated proportions of households/persons in that category appear as zero (0). Estimated numbers 'in per cent' are also shown as zero (0), when they are greater than 0 but less than 0.05. While presenting the estimates for the year PLFS 2025 in this report, transgender has been included in person only. In the Statements/Tables where estimates are presented in percentages/percentage distributions, these are obtained by excluding not reported (n.r.) cases.

1.7.4 It may be noted that as the estimates in Tables/Statements are generally presented as 'percentage distribution' or rates 'in per cent', the figures are rounded off. Thus, while using the ratios from the survey results, the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. While using the State/UT level estimates, it may be noted that the sample sizes for the smaller States/UTs may not be adequate for getting sufficiently reliable estimates for some of the employment and unemployment characteristics.

From 2025, the sampling design of the Periodic Labour Force Survey (PLFS) has been modified with the objective of generating high-frequency estimates of key labour force indicators. The revised design involves changes in sample allocation, sample selection and rotational panel to support the production of high-frequency estimates. As a result of these methodological changes, the annual estimates presented in this report are derived from a sampling framework that differs from that used in earlier PLFS annual estimates. Although the concepts, definitions and coverage of labour force indicators remain broadly unchanged, the change in sampling design and estimation procedure may influence the level of the estimates. Consequently, the annual estimates for 2025 may not be strictly comparable with those presented in the previous annual reports of the Periodic Labour Force Survey or calendar year-wise results derived from unit-level data for the years 2022 to 2024 presented in the report.

2.0 Summary of Findings

2.0.1 The summary of findings of the Periodic Labour Force Survey (PLFS) (January 2025 - December 2025) at all-India level presented here is arranged in the following Eleven Sections:

- Section One: Labour Force
- Section Two: Workforce
- Section Three: Employment in Informal Sector and Conditions of Employment
- Section Four: Earnings from employment
- Section Five: Hours worked
- Section Six: Unemployment
- Section Seven: Employment status among social groups
- Section Eight: Employment status among major religious groups
- Section Nine: Education and Vocational Training
- Section Ten: Additional Indicators in Current Weekly Status
- Section Eleven: Estimate of workers

2.1 Section One: Labour Force

2.1.0 Labour force, or in others words, the 'economically active' population includes both 'employed' and 'unemployed' persons. Estimates of the labour force have been obtained based on the following approaches:

(i) according to the *usual status (ps+ss)* approach, i.e., by considering usual principal and subsidiary activity together,
(ii) according to the *current weekly status* approach

The labour force according to the *usual status (ps+ss)* is obtained by considering the *usual principal status* and the *subsidiary status* together. The estimate of the labour force in the *usual status (ps+ss)* includes (a) the persons who either worked or were seeking/available for work for a relatively long part of the 365 days preceding the date of survey and also (b) those persons among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey.

The labour force in *current weekly status* gives the average picture of the labour force participation in a short period of one week during the survey period. The estimate of labour force according to the current weekly status approach is derived by considering those who worked for at least 1 hour or was seeking/ available for work for at least 1 hour on any day during the 7 days preceding the date of survey.

2.1.1 Labour Force Participation Rates (LFPR) in usual status (ps+ss) and current weekly status (CWS)

2.1.1.1 The Labour Force Participation Rate (LFPR) is defined as the percentage of persons in the labour force among the persons in the population. In Statement 1, LFPR in *usual status (ps+ss)* and in CWS obtained from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 are presented at the all-India level.

Statement 1: LFPR (in per cent) according to usual status (ps+ss) and CWS estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

category of persons	LFPR during 2025 in		LFPR during 2024 in		LFPR during 2023 in		LFPR during 2022 in

person	44.9	42.2	44.7	42.2	44.9	42.2	41.1	38.7

2025 refers to the period January 2025 – December 2025 and likewise for 2024, 2023 and 2022

2.1.1.2 Detailed Table in Appendix A: Labour Force Participation Rate according to usual status (ps+ss) for each State/UT is given in Table 16.0. Labour force participation rate according to usual principal status for each State/UT is given in Table 16.1.

2.1.1.3 Detailed Tables in Appendix A: Labour Force Participation Rate according to *current weekly status* for each State/UT is given in Table 30.

2.1.2 Labour Force Participation Rates (LFPR) in usual status for different age groups

2.1.2.1 In Statement 2, the LFPR for persons based on *usual status (ps+ss)* obtained from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 are presented at the all-India level for the following age groups:

- 15-29 years
- 15 years and above
- all ages

Figure 1 presents LFPR in rural areas and in Figure 2 the corresponding figures for urban areas are presented.

2.1.2.2 Detailed Table in Appendix A: Labour Force Participation Rate according to usual status (ps+ss) for different age groups are given in Table 16.0.

Statement 2: Labour force participation rates (in per cent) in usual status (ps+ss) estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 for persons of 15-29 years, 15 years & above and persons of all ages

all-India

age group	rural			urban			rural+urban

2.1.3.2 Detailed Table in Appendix A: The percentage distribution of persons not in labour force in usual status (ps+ss) by main reason for not being in the labour force for each State/UT is given in Table 45.

2.2 Section Two: Workforce

2.2.0 In this Section, various estimates of the employed persons are presented. The estimates of employed persons have been obtained based on the following approaches:

(i) according to the *usual status (ps+ss)* approach, i.e., by considering usual principal and subsidiary activity together,

(ii) according to the *current weekly status* approach

The workforce in the *usual status (ps+ss)* is obtained by considering the *usual principal status* and the *subsidiary status* together. The workforce in the *usual status (ps+ss)* includes (a) the persons who worked for a relatively long part of the 365 days preceding the date of survey and (b) the persons from among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey.

The workforce measured in *current weekly status* (CWS) gives the average picture of the workforce in a short period of one week during the survey period. The estimate of workforce in the *current weekly status* is derived considering those who worked for at least 1 hour on any day during the 7 days preceding the date of survey.

2.2.1 Worker Population Ratio (WPR) in different approaches

2.2.1.1 Worker Population Ratio (WPR) is the percentage of persons employed among the persons in the population. In Statement 4, WPR in *usual status (ps+ss)* and in CWS, as estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 are presented at the all-India level.

Statement 4: WPR (in per cent) according to usual status (ps+ss) and CWS estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

2025 refers to the period January 2025 – December 2025 and likewise for 2024, 2023 and 2022

2.2.1.2 Detailed Table in Appendix A: Worker Population Ratio (WPR) according to usual status (ps+ss) for each State/UT is given in Table 17.0. Worker Population Ratio (WPR) according to usual principal status for each State/UT is given in Table 17.1.

2.2.1.3 Detailed Table in Appendix A: WPR according to current weekly status for each State/UT is given in Table 31.

2.2.2 Worker Population Ratio (WPR) in usual status (ps+ss) for different age groups

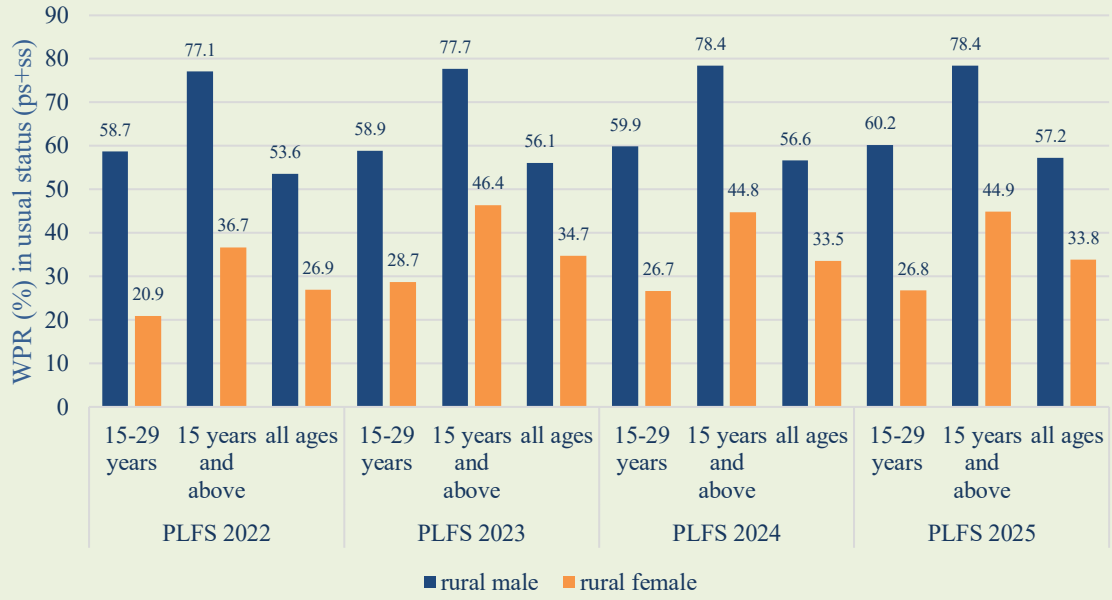
2.2.2.1 In Statement 5, the estimates of WPR based on *usual status (ps+ss)* approach obtained from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 are presented at the all-India level for the following age groups:

- 15-29 years
- 15 years and above
- all ages

Figure 3 presents WPRs in rural areas and in Figure 4 the corresponding figures for urban areas are presented.

2.2.2.2 Detailed Table in Appendix A: Worker Population Ratio according to usual status (ps+ss) for persons of different age groups for each State/UT is given in Table 17.0.

Figure 3: WPR (in per cent) in usual status (ps+ss) in rural areas



Statement 5: WPR (in per cent) in usual status (ps+ss) estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 for persons of age 15-29 years, 15 years and above and persons of all ages

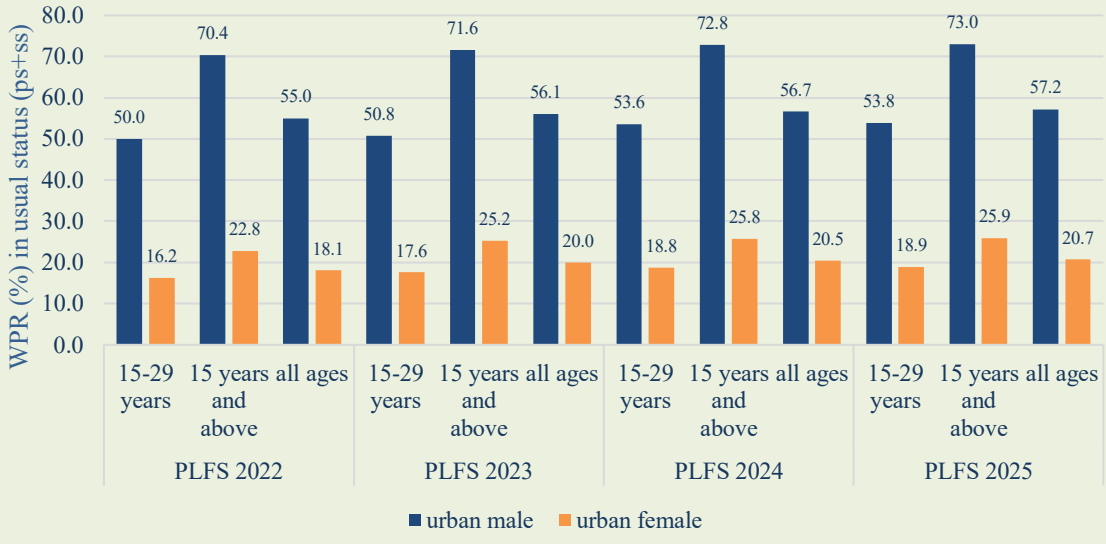
Figure 4: WPR (in per cent) in usual status (ps+ss) in urban areas



2.2.3 Education level specific WPR in usual status (ps+ss) for persons of age 15 years and above

2.2.3.1 The percentage of workers in usual status (ps+ss) having particular levels of education among persons with that level of education is defined as the education level-specific WPR. The highest level of education successfully completed by the person has been considered as the education level of the person. The education level-specific WPRs in usual status (ps+ss) for persons of age 15 years and above, as obtained from PLFS 2025 are presented in Statement 6 for different levels of education.

Statement 6: WPRs (in per cent) in usual status (ps+ss) in different levels of education among persons of age 15 years and above estimated from PLFS 2025

2025 refers to the period January 2025 – December 2025

2.2.3.2 Detailed Table in Appendix A: Worker Population Ratio (WPR) according to usual status (ps+ss) for persons of age 15 years and above of different general education level for each State/UT is given in Table 23.

2.2.4 Distribution of workers in *usual status (ps+ss)* by status in employment

2.2.4.1 The workers in usual status (ps+ss) are categorised into three broad categories according to their status in employment. These broad categories of status in employment of the workers are: (i) *self-employed*, (ii) *regular wage/salaried employee* and (iii) *casual labour*. Within the category of *self-employed,* two sub-categories have been made as follows: (i) *own account worker and employer* and (ii) *unpaid helper in household enterprises (or contributing family worker)*. Distribution of the workers in usual status (ps+ss) by status in employment is given in Statement 7. In Figure 5 and Figure 6, the distributions of the workers by status in employment in rural and urban areas are presented.

2.2.4.2 Detailed Table in Appendix A: Percentage distribution of workers in usual status (ps+ss) by broad status in employment for each State/UT is given in Table 19.

Statement 7: Percentage distribution of workers in usual status (ps+ss) by status in employment estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

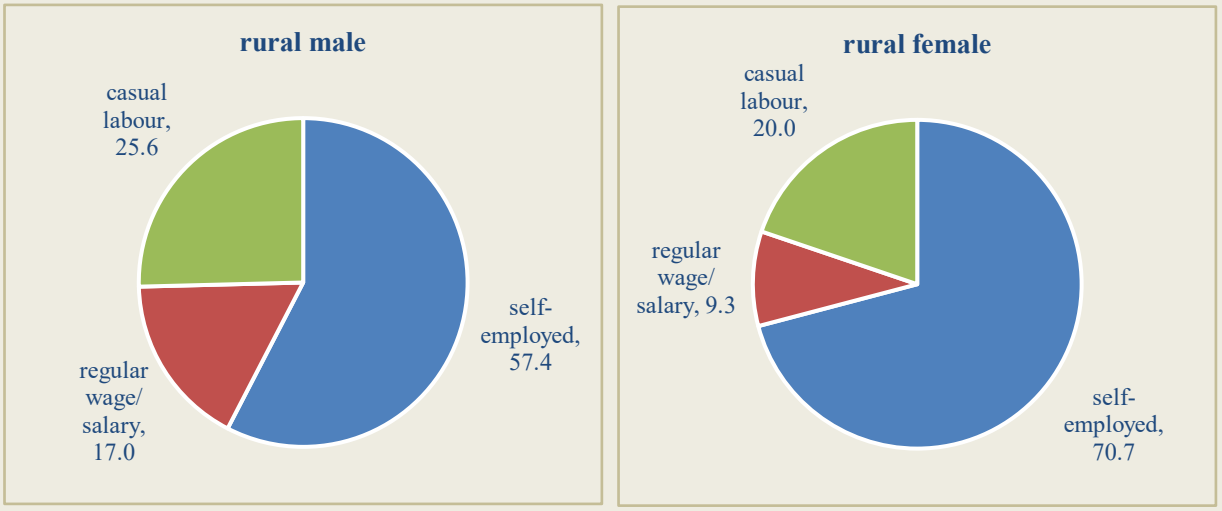

Figure 6: Percentage distribution of workers in usual status (ps+ss) in urban areas by status in employment estimated from PLFS 2025

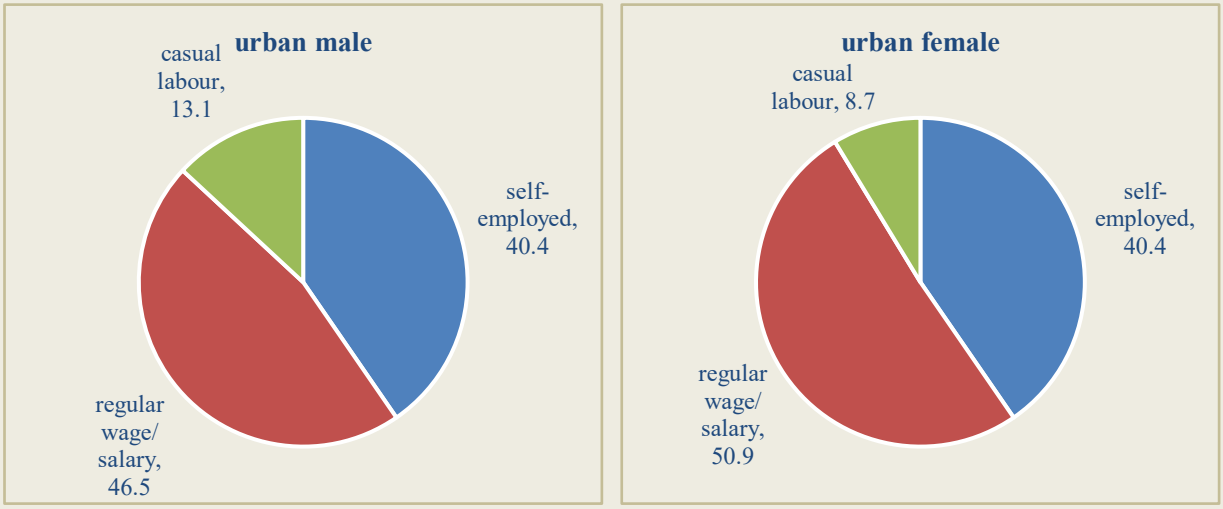

2.2.5 Industrial distribution of workers in usual status (ps+ss)

2.2.5.1 For classification of industry of work of the employed persons in usual status (ps+ss), the National Industrial Classification 2008 (NIC 2008) was used. In Statement 8, distribution of workers in usual status (ps+ss) is presented by broad industry division from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025.

2.2.5.2 Detailed Table in Appendix A: Percentage distribution of usually working persons (ps+ss) by industry of work (4-digit code / division / section as per NIC-2008) at all-India level is given in Table 26. Percentage distribution of usually working persons (ps+ss) by industry sections of NIC-2008 for each State/ UT is given in Table 27.

Statement 8: Percentage distribution of workers in usual status (ps+ss) by broad industry division estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

Note 2: 2025 refers to the period January 2025 – December 2025 and likewise for 2024, 2023 and 2022

2.3 Section Three: Employment in informal sector and conditions of employment

2.3.1 Informal sector enterprises:

2.3.1.1 According to the 15th ICLS conceptual framework, unincorporated enterprises owned by households (i.e., *proprietary* and *partnership* enterprises including the informal producers' cooperatives) are largely considered as *informal sector* enterprises. In PLFS, *proprietary* and *partnership* enterprises are considered as *informal sector* enterprises. In Statement 9, the share of workers in informal sector among workers in usual status (ps+ss) in non-agriculture sector is presented.

Statement 9: Percentage of workers engaged in *proprietary* and *partnership* (P & P) enterprises among workers (ps+ss) engaged in non-agriculture sector estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

person	66.0	66.8	66.0	65.7
		rural+urban		
male	76.3	77.3	76.7	77.7
female	63.1	60.8	61.6	59.6
person	73.1	73.6	73.3	74.0

2025 refers to the period January 2025 – December 2025 and likewise for 2024, 2023 and 2022

2.3.1.2 Detailed Table in Appendix A: Percentage distribution of usually working (ps+ss) persons by enterprise type for each State/ UT is given in Table 35.

2.3.2 Conditions of Employment

2.3.2.1 In this survey, from the employees (regular wage/salaried persons and casual labour) in usual status (ps+ss), information on the following conditions of employment was collected:

- *whether there was any written job contract in the employment,*
- *whether employees were eligible for the paid leave*
- *whether employees were covered under any specified social security benefits*.

In Statement 10, percentage of *regular wage/ salaried employees* in usual status (ps+ss) engaged in non-agriculture sector in various conditions of employment is presented.

These are:

(i) Regular wage/salaried employees in usual status (ps+ss) engaged in non-agricultural sector who had no written job contract

Information on *type of job contract* was recorded in terms of four categories viz. (i) *no written job contract, (ii)written job contract for 1 year or less, (iii) written job contract for more than 1 year to 3 years and (iv) written job contract for more than 3 years.*

(ii) Regular wage/salaried employees in usual status (ps+ss) engaged in non-agricultural sector who were not eligible for paid leave

Paid leave included leave during sickness, maternity or such leave as an employee was eligible to take without loss of pay, as per the conditions of employment. The situation was assessed excluding the paid off-days/holidays, which an enterprise normally allows to its employees.

(iii) Regular wage/salaried employees in usual status (ps+ss) engaged in non-agricultural sector who were not eligible for any specified social security benefits

For this survey the following social security benefits were only considered:

only PF/ pension (i.e., GPF, CPF, PPF, pension, etc.).
only gratuity
only health care/maternity benefits
only PF/ pension and gratuity
only PF/ pension and health care/maternity benefits.
only gratuity and health care/maternity benefits
PF/ pension, gratuity and health care/maternity benefits

Those who were not covered under any of the above social security schemes were considered as not eligible for any specified social security benefits.

Statement 10: Percentage of regular wage/salaried employees who had no written job contract, not eligible for paid leave and not eligible for the specified social security benefits among regular wage/salaried employees in usual status (ps+ss) in non-agriculture sector estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

2025 refers to the period January 2025 – December 2025 and likewise for 2024, 2023 and 2022

2.3.2.2 Detailed Table in Appendix A: Percentage of regular wage/ salaried employees in usual status (ps+ss) in non-agriculture sector *without written job contract, not eligible for paid leave and not eligible for any specified social security benefit (SSB)* for each State/ UT is given in Table 36.

2.4 Section Four: Earnings from employment

2.4.0 In PLFS, information on earnings from employment was collected for all three categories of workers, viz., *self-employed persons*, *regular wage/salaried employees* and *casual labour* as follows*:*

- For self-employed persons in current weekly status, information on earnings during the last 30 days from the self-employment activity in which the person was working as per current weekly status was collected.
- For regular wage/salaried employees in current weekly status, information on earnings during the preceding calendar month from the regular wage/salaried work in which the person was employed in the current weekly status was collected.
- For casual labour, information on earnings was collected for the casual labour work in which the person was engaged for each day of the reference week.

The estimates in this section are derived on the basis of data collected in the first visit schedules.

2.4.1 Earnings by regular wage/salaried employees in current weekly status during the preceding calendar month

2.4.1.1 Statement 11 presents average wage/ salary earnings during the preceding calendar month received by regular wage/ salaried employees in current weekly status.

2.4.1.2 Detailed Table in Appendix A: Average wage/salary earnings during the preceding calendar month from the regular wage/salaried employment among the regular wage/ salaried employees in CWS for each State/ UT are given in Table 38.

Statement 11: Average wage/ salary earnings (in Rs) during the preceding calendar month by the regular wage/ salaried employees in current weekly status estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

survey period	rural			urban			rural+urban

2.4.2 Average wage earnings by casual labour engaged in work other than public works per day

2.4.2.1 In PLFS, wage earnings by casual labour were recorded for each of the days of the reference week (last 7 days preceding the date of the survey) when the household member had worked as casual labour. Statement 12 presents the average wage earnings per day by casual labour engaged in works other than public works during the survey period.

Statement 12: Average earnings (in Rs.) per day by casual labour engaged in works other than public works estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

survey period	rural			Urban			rural+urban		
	male	female	person	male	female	person	male	female	person

2022	412	263	382	492	316	469	424	268	394

2.4.2.2 Detailed Table in Appendix A: Average wage earnings per day from casual labour work other than public works in CWS for each State/ UT are given in Table 39.

2.4.3Average gross earnings from self-employment work during last 30 days by the self-employed persons in current weekly status

2.4.3.1 In PLFS, information on gross earnings from self-employment work was collected through a single-shot question from the self-employed persons in current weekly status. In Statement 13, average gross earnings during the last 30 days from the self-employment work by the self-employed persons in the current weekly status are presented. It may be noted that average gross earnings have been calculated by excluding those self-employed persons who had reported earning as zero/not reported cases.

2.4.3.2Detailed Table in Appendix A: Average gross earnings during last 30 days from self-employment among self-employed persons in CWS for each State/ UT are given in Table 40.

Statement 13: Average gross earnings (in Rs.) during the last 30 days from self-employment work in current weekly status estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

survey period	rural			urban			rural+urban

2.5 Section Five: Hours worked

2.5.1 In PLFS, information on hours worked during each day of the reference week was recorded when the household member was engaged in economic activity. In this section, estimates are presented on hours actually worked during the reference week. The estimates in this section are derived based on data collected in the first visit schedules of the survey period.

2.5.2 Average hours actually worked

2.5.2.1 In Statement 14, average number of hours actually worked, considering all the economic activities in a week are presented for different statuses in employment in current weekly status.

Statement 14: Average number of hours actually worked in a week by workers in different statuses in employment during the survey period January - December 2025

all-India

2.5.3.2 *Detailed Table in Appendix A:* percentage distribution of workers in Current Weekly Status (CWS) by number of days worked in a week for each State/ UT is given in Table 53.

2.6 Section Six: Unemployment

2.6.0 Estimates relating to unemployment rate in PLFS are obtained in the following approaches:

(i) in the *usual status (ps+ss)* approach. In this approach, the estimates of unemployment rates are based on usual status considering principal and subsidiary statuses together and is called unemployed in *usual status (ps+ss)* or *usual status (adjusted)*.
(ii) in the *current weekly status* approach.

The estimate of unemployed in *current weekly status* gives an average picture of unemployment in a short period of 7 days during the survey period. According to the *current weekly status* approach, a person was considered unemployed in a week if he/she did not work even for 1 hour during the week but sought or were available for work at least for 1 hour during the week.

2.6.1 Unemployment Rates

2.6.1.1 *Unemployment rate* (UR) is defined as the percentage of unemployed persons in the *labour force*. In Statement 16, unemployment rate in usual status (ps+ss) and current weekly status obtained from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 are presented. In this Statement, the proportion of unemployed (in per cent) in the population is also presented in parentheses.

Statement 16: Unemployment rates (in per cent) and Proportion of Unemployed (PU) according to usual status (ps+ss) and current weekly status (CWS) estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

all-India

Note 1: Figures in parenthesis give the proportion of unemployed (PU) person in the population in per cent
Note 2: 2025 refers to the period January 2025 – December 2025 and likewise for 2024, 2023 and 2022

2.6.1.2 Detailed Table in Appendix A: Unemployment Rate according to usual status (ps+ss) for each State/UT is given in Table 18.0. Unemployment Rate (UR) according to usual principal status for each State/UT is given in Table 18.1.

2.6.1.3 Detailed Table in Appendix A: Unemployment Rate according to current weekly status for each State/UT is given in Table 32.

2.6.2 Unemployment Rates among the Educated

2.6.2.1 For the purpose of this report, the educated persons are defined as those who have attained the educational level of *secondary and above*. Normally, one can attain this educational level at the age of 15 years or above. Thus, the unemployment rate among the educated is presented for persons of age 15 years and above. In Statement 17, the unemployment rates in usual status (ps+ss) for different educational attainments at the all-India level obtained from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025 are presented.

Statement 17: Unemployment rates (in per cent) according to usual status (ps+ss) for the persons of age 15 years and above with different educational attainments estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

2.7 Section Seven: Employment status among social groups

2.7.0 In this section the employment status among persons belonging to the four social groups, viz., *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and the rest referred to as *others* are presented. In PLFS, for each household surveyed, the social group to which the head of the household belonged was recorded. The social group of the head of the household was considered as the social group of all the members of the household, irrespective of the actual social group to which the individual members belonged. It may be noted that the scope of the survey being all households without special focus on social groups, sample design was not tailored to specifically net the social groups like *Scheduled Caste (SC)* and *Scheduled Tribe (ST)*, etc. Thus, sample size for the social groups in different States/UTs may not be enough to provide sufficiently reliable estimates of the various indicators and therefore, the estimates for the social groups are not presented for different States/UTs in the Report.

2.7.1 Labour Force Participation Rate among persons in different social groups

2.7.1.1 In Statement 20, LFPRs (in per cent) in usual status (ps+ss) among persons belonging to different social groups during 2022, 2023, 2024 and 2025 are presented. In Figure 7, LFPR among different social groups during 2025 is presented.

2.7.1.2 Detailed Table in Appendix A: LFPR in usual status (ps+ss) for different social groups at all-India level is given in Table 48.

Statement 20: Labour Force Participation Rate (in per cent) according to usual status (ps+ss) for different social groups estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

2.8 Section Eight: Employment status among religious groups

2.8.0 In PLFS information on the religious group to which the head of the household belonged was collected and for the purpose of this report, for each household surveyed, the reported religion of the head of the household was considered as the religion of all the members of the household, irrespective of the actual religion followed by individual members. Religious group of the household members was recorded in the following 8 categories: *Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism, Zoroastrianism,* and the rest referred to as *others*. It may be noted that the scope of the survey being all households without special focus on religious groups, sample design was not tailored to specifically net different religious groups. Thus, sample size for the religious groups in different States/UTs may not be enough to provide sufficiently reliable estimates of the various indicators and therefore, the estimates for the religious groups are not presented for different States/UTs in the Report. Estimates in this section have been presented for the following religious groups: *Hinduism, Islam, Christianity and Sikhism,* which are referred to as major religious groups in this Report.

2.8.1 Labour force participation rate among persons in major religious groups

2.8.1.1 In Statement 23, LFPRs (in per cent) in usual status (ps+ss) among major religious groups during 2022, 2023, 2024 and 2025 are presented. LFPR among major religious groups during 2025 is presented in Figure 9.

Statement 23: Labour Force Participation Rate (LFPR) (in per cent) according to usual status (ps+ss) for major religious groups estimated from PLFS 2022, PLFS 2023, PLFS 2024 and PLFS 2025

2.9 Section Nine: Education and Vocational Training

2.9.1 Average number of years in formal education

2.9.1.1 Number of years in formal education refers to the number of academic years a person attended, or participated in a formal education program (structured in terms of learning objectives, learning time or learning support and leading to degree/diploma/certificate) provided by elementary and secondary schools, universities, colleges and other institutions providing general/technical/vocation education, like polytechnics, ITIs, etc. However, years in education at the level of pre-primary education have not been considered as formal education. Estimates of the average number of years in formal education have been derived using the following approach:

(i) persons whose general level of education is primary or above, as well as those whose general level of education is pre-primary but who have completed at least Class I, have been considered in the calculation of years of formal education.

(ii) the average number of years in formal education has been calculated among persons who have completed at least one year of formal education, as defined in item (i) above.

2.9.1.2 The PLFS schedule has been modified to facilitate the calculation of the average number of years in formal education from January 2025. In Statement 26, average number of years in formal education for the age group 15 years and above and 25 years and above obtained from PLFS 2025 is presented.

Statement 26: Average number of years in formal education for persons with formal education in the age group 15 years and above and 25 years and above estimated from PLFS 2025

all-India

sector	15 years and above			25 years and above		
	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)
rural	9.6	9.2	9.4	9.3	8.6	9.0
urban	11.2	10.9	11.1	11.2	10.8	11.0
rural+urban	10.2	9.9	10.0	10.0	9.5	9.8

2025 refers to the period January 2025 – December 2025

***2.9.1.3 Detailed Table in Appendix A*:** Average number of years in formal education for persons with formal education in the age group 15 years and above and 25 years and above for each State/ UT is given in Table 11.1.

2.9.2 Persons with at least secondary education

2.9.2.1 Estimates of persons with at least secondary education have been derived using the following approach:

(i) at least secondary education includes persons whose general education level is middle or above, as well as persons who have completed primary education and have attended lower secondary or middle level of education

(ii) the proportion of persons with at least secondary education has been calculated among persons

2.9.2.2 The PLFS schedule has been modified in January 2025 to facilitate the calculation of the percentage of persons with at least secondary education. In Statement 27, the percentage of persons with at least secondary education for the age group 15 years and above and 25 years and above obtained from PLFS 2025 is presented.

Statement 27: Percentage of persons with at least secondary education in the age group 15 years and above and 25 years and above estimated from PLFS 2025

all-India

sector	15 years and above			25 years and above		
	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)

2.9.3.2 Formal vocational training and broad activity status

2.9.3.2.1 Percentage distribution of persons in the age group 15-59 years who received formal vocational/ technical training by each of the broad activity status (viz., employed, unemployed and out of labour force) in the usual activity status (ps+ss) obtained from PLFS 2025 is given in Statement 29 at the all-India level.

Statement 29: Percentage distribution of persons in the age group 15-59 years who received formal vocational/ technical training by broad usual activity status (ps+ss) estimated from PLFS 2025

all-India

category of person	employed	unemployed	out of labour force	all
(1)	(2)	(3)	(4)	(5)
rural

2025 refers to the period January 2025 – December 2025

***2.9.3.2.2 Detailed Table in Appendix A*:** Percentage distribution of persons who received formal vocational/ technical training in the age group 15-59 years by broad usual activity status (ps+ss) is given in Table 14.

2.9.4 Person not in employment, education or training

2.9.4.1 The PLFS schedule was modified in July 2025 to facilitate the estimation of the percentage of persons not in employment, education or training (NEET). Estimates of NEET have been derived for both usual status (ps+ss) and current weekly status (CWS). Under the usual status, the reference period of the last 365 days has been considered for determining employment and participation in training. Under CWS, the reference periods considered for employment and training are the last 7 days and the last 30 days, respectively. Under both statuses, currently attending status has been considered for determining participation in education. In Statement 30, the estimate of percentage of persons not in employment, education and training in usual status (ps+ss) and current weekly status for persons of 15-24 years, 15-29 years, 30-59 years and 15-59 years obtained from PLFS 2025 is presented at the all-India level.

Statement 30: Percentage of persons not in employment, education and training in usual status (ps+ss) and current weekly status estimated from PLFS 2025 for persons of age 15-29 years, 30-59 years and 15-59 years

all-India

age group	rural			urban			rural+urban		
	male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
				usual status (ps+ss)					
15-24 years	8.3	35.9	22.0	8.7	30.3	18.9	8.4	34.2	21.0
15-29 years	7.5	42.0	25.0	8.9	42.7	25.0	8.0	42.2	25.0
30-59 years	2.6	35.4	19.6	4.4	65.0	34.9	3.2	45.2	24.8
15-59 years	4.6	38.0	21.8	6.2	56.6	31.0	5.2	44.0	24.9
				current weekly status					
15-24 years	11.6	41.4	26.4	11.1	32.4	21.2	11.4	38.7	24.8
15-29 years	11.1	49.7	30.6	11.4	45.6	27.7	11.2	48.4	29.7
30 -59 years	4.3	44.4	25.1	6.0	67.6	37.0	4.9	52.1	29.2
15-59 years	7.1	46.6	27.4	8.2	59.3	33.4	7.4	50.7	29.4

2025 refers to the period January 2025 – December 2025

2.9.4.2 The age group 15–29 years represents a crucial phase of transition from education to the labour market, characterised by significant shifts in individuals' engagement with schooling, skill acquisition and employment. Given the heterogeneity within this broad cohort, NEET indicator at the aggregate level (age 15–29 years) may mask important

variations across sub-cohorts. Accordingly, the 15–29 age group is further disaggregated into three narrower sub-groups, namely, 15–19 years, 20–24 years and 25–29 years, presented in Statement 30.1, under both usual status (ps+ss) and current weekly status. However, State/UT-wise detailed table for these narrow age groups has not been included in the report.

Statement 30.1: Percentage of persons not in employment, education and training in usual status (ps+ss) and current weekly status estimated from PLFS 2025 for persons of age 15-19 years, 20-24 years and 25-29 years

all-India

age group	rural			urban			rural+urban

25-29 years	10.0	66.8	39.8	11.9	70.5	40.4	10.7	68.0	40.0

2025 refers to the period January 2025 – December 2025

***2.9.4.2 Detailed Table in Appendix A*:** Percentage of persons not in employment, education and training in usual status (ps+ss) and current weekly status for persons in age group 15-24 years, 15-29 years, 30-59 years and 15-59 years for each State/ UT is given in Table 57.1 and 57.2.

2.10 Section Ten: Additional Indicators in Current Weekly Status

2.10.1 In Statement 31, (i) ratio of female workers to male workers working as Legislators, Senior officials and Managers, (ii) ratio of female workers to male workers working as Professionals and Technical Workers and (iii) percentage of female employed with advanced degree among total employed obtained from PLFS 2025 under the CWS approach are presented.

Statement 31: Additional indicators in current weekly status estimated from PLFS 2025

all-India

Description of the Indicator	rural	urban	rural+urban
(1)	(2)	(3)	(4)
Ratio of female workers to male workers working as Legislators, Senior officials and Managers (age group: 15 years and above)	12.3	13.4	13.1
Ratio of female workers to male workers working as Professionals and Technical Workers (age group: 15 years and above)	52.2	48.5	49.9
Percentage of female employed with advanced degree among total employed (age group: 25 years and above)	1.8	7.3	3.5

2.10.2 The indicators (i) and (ii) are based on the information on occupation collected using the National Classification of Occupation (NCO), 2015. Occupation division 1 has been considered for indicator (i) and occupation divisions 2 and 3 have been considered for indicator (ii). Further, the indicator (iii) is based on the information on highest level of education successfully completed. The highest level of education, 'graduation' and/or 'post-graduation and above', has been considered as an advanced degree.

***2.10.3 Detailed Table in Appendix A*:** Estimates of indicators (i) ratio of female workers to male workers working as Legislators, Senior officials and Managers, (ii) ratio of female workers to male workers working as Professionals and Technical Workers and (iii) percentage of female employed with advanced degree among total employed in current weekly status for each State/ UT are given in Table 61, Table 62 and Table 63 respectively.

2.11 Section Eleven: Estimate of workers

2.11.1 The Worker Population Ratio (WPR) estimates in usual status (ps+ss) obtained from PLFS 2025 have been applied to the projected population[1] made available by the Ministry of Health and Family Welfare (MoHFW) to generate the worker estimates in absolute terms.

2.11.2 Statement 32 gives the estimate of workers in usual status (ps+ss) for the survey period January - December, 2025 in absolute terms. It may be noted that estimated totals may not match exactly due to rounding-off effects. The details of the calculation steps are given in Annexure C.

Statement 32: Estimates of workers in usual status (ps+ss) in absolute terms for the survey period January-December 2025 based on the population projection given by M/o H&FW

all-India

Aggregate / Indicator	urban		total		rural	
	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Projected population as on 1st July 2025 from MoHFW Report (in 000)	2,62,956	2,44,445	7,27,867	6,89,625	4,64,911	4,45,180
Proportion of estimated population of age 15 years and above during Jan-Dec, 2025 from PLFS	0.78	0.80			0.73	0.75
Projected population as on 1st July 2025 of age 15 years and above (in 000) obtained by applying the PLFS proportion to projected population	2,05,106	1,95,556			3,39,385	3,33,885
WPR (%) in usual status (ps+ss) for persons of age 15 years and above during Jan - Dec, 2025	73.0	25.9			78.4	44.9
Estimated no of workers in usual status (ps+ss) during Jan-Dec, 2025 (in 000)	1,49,727	50,649	4,15,805	2,00,563	2,66,078	1,49,914
Estimated total no. of workers in usual status (ps+ss) during Jan - Dec, 2025 (in 000)	6,16,368

2.11.3 Note regarding estimation of number of workers

It may be noted that the accuracy of the worker estimates in absolute terms is dependent on the quality of the projected population figures. Regarding the projected population figures, it is to be noted that population projection is a scientific attempt to peep into the future population scenario, under certain assumptions by using available data at that point of time. The assumptions made with the probability of their coming out to be true form a critical input in this mathematical effort. Predicting the future course of human fertility and mortality is not an easy task, especially when looking ahead in time, is bound to be influenced by medical and health intervention strategies, food production and its equitable distribution, climatic conditions, socio-cultural setting, politico-economic conditions, and a host of other factors affecting the population dynamics. This makes it a really difficult exercise. Therefore, caution must be exercised while interpreting these worker estimates using the population projections in the context of various conditions imposed.

Table (53)	Percentage distribution of workers in Current Weekly status (CWS) by number of days worked in a week for each State/UT
Table (54)	Percentage distribution of persons in labour force in Current Weekly status (CWS) by number of days unemployed in a week for each State/ UT
Table (55)	Percentage distribution of self-employed persons in usual status (ps+ss) engaged in agriculture, forestry, fishing, mining and quarrying (industry Div. 01 – 09 of NIC 2008) by use of product of the economic activity
Table (56)	Percentage of persons with at least secondary education in the age group 15 years and above and 25 years and above for each State/ UT
Table (57.1)	NEET (in per cent) in usual status (ps+ss) for different age groups for each State/ UT
Table (57.2)	NEET (in per cent) in CWS for different age groups for each State/ UT
Table (58.1)	Distribution of population by NEET status in usual status (ps+ss) for each State / UT
Table (58.2)	Distribution of population by NEET status in CWS for each State / UT
Table (59.1)	Distribution of NEET population in usual status (ps+ss) by highest level of education successfully completed for each State / UT
Table (59.2)	Distribution of NEET population in CWS by highest level of education successfully completed for each State / UT
Table (60)	Percentage of persons in formal or non-formal education or training in the previous 12 months for each State / UT
Table (61)	Ratio of female workers to male workers (in percent) in current weekly status (CWS) engaged as Legistators, Senior Officials and Managers for each State/UT
Table (62)	Ratio of female workers to male workers (in percent) in currently weekly status (CWS) engaged as Professionals and Technical workers for each State/UT
Table (63)	Percentage of female employed with advanced degree among total employed for each State/UT

Note:
1. All figures are based on first visit schedule for rural and urban areas
2. For Chandigarh as per the frame there is no rural area
3. Estimated number of workers, wherever given, is design-based estimates and may be used as control totals for combining and arriving at rates and ratios. These figures are not intended for providing the number of workers.

Table (1):Number of villages/blocks, households surveyed and persons enumerated by age and gender for each State/ UT

rural

State/ UT	number of surveyed villages	households	persons of age																		
			0-4 years			5-14 years			15-29 years			15-59 years			15 yrs & above			all ages			
			Male	Female	Person	Male	Female	Person	Male	Female	Person	Male	Female	Person	Male	Female	Person	Male	Female	Transgender	Person

sample no. of self-employed persons in CWS*	88,117	35,788	123,907	54,294	13,449	67,748	142,411	49,237	191,655

Note:

1. reported earnings from self-employment*

2.For calculation of average gross earnings from self-employment, estimated persons with current weekly status 11 to 62 who reported gross earnings have been considered

3.Cell value zero(0) indicates no sample observation in the respective category

Table (41): Average no. of days worked in a week for workers in CWS and average number of hours actually worked per week considering all the economic activities performed during the week for workers in CWS for each State/ UT
rural male

State \ UT	average no. of days (0.0) worked in a week for person with broad status in employment in CWS						average no. of days (0.0) actually worked in a week for person with broad status in employment in CWS						average number of hours (0.0) actually worked per week considering all the economic activities performed during the week for person with broad status in employment in CWS

Appendix C

Concepts and Definitions

Appendix - C

Concepts and Definitions

2.0 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 Household and household size: A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb "normally" means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer's/host's household. "Living together" was given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person's family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household. The same principle was applicable for the residential staff of such establishments. However, if a group of persons among them pooled their income for spending, they were treated as forming a single household. A family living in a hotel was treated as a single household. The size of a household is the total number of persons in the household.

2.2 Age (years): The age in completed years, as on the date of survey, of the household members were recorded.

2.3 Household type: The household type was decided based on the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In **rural** areas, a household belonged to any one of the following six household types:

1.self-employed in agriculture
2.self-employed in non-agriculture
3.regular wage/salary earning
4.casual labour in agriculture
5. casual labour in non-agriculture
6. others

For **urban** areas, the household types are:

1.self-employed
2.regular wage/salary earning
3.casual labour
4.others

2.4 General educational level: A person who can both read and write a simple message with understanding in at least one language was considered as literate for the purpose of the survey. For all the individuals who were found to be literate, the general level of education was collected in terms of highest level of education successfully completed by him/her. Highest level of education successfully completed by each member of the household was decided by considering his/ her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. *(i) not literate, (ii)* literate without formal schooling*: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/ Adult Literacy Centres (AEC), (b) Total Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) primary (v) middle, (vi) secondary, (vii) higher secondary, (viii) diploma/certificate course, (ix) graduate, and (x) postgraduate and above*. The criteria for deciding primary, middle, secondary, etc. levels were the same as that has been followed in the concerned states/union territories. The category 'diploma or certificate course' meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category 'graduate'. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category 'post-graduate and above'.

2.5 Vocational/ Technical Training: A vocational/ technical training can broadly be defined as training through which knowledge and skills for the world of work were acquired. The main objective of vocational/ technical education and training is to make individuals employable for a broad range of occupations in various industries and other economic sectors. There are three methods of acquiring Vocational/ Technical training:

2.5.1 Formal Training: The training that is acquired through institutions/ organisations and is recognised by national certifying bodies, leading to diplomas/ certificates and qualifications. Formal training is structured according to educational arrangements such as curricula, qualifications, teaching/ learning requirements and assessment. Formal training is intentional from the learner's perspective.

***2.5.2 Non- formal Training*:** The training that is in addition or alternative to formal learning and is also structured but is more flexible. It is provided through community-based settings, the workplace, or through the activities of civil society organisations or any organisation imparting

training. This training mode does not have the level of curriculum, syllabus or accreditation and certification associated with formal learning but it is more structured as compared to informal learning.

***2.5.3 Informal Training*:** The training that occurs in daily life, in the family, in the workplace, in communities, and through the interests and activities of individuals. It is not structured (in terms of learning objectives, learning time or learning support) and typically does not lead to certification.

2.5.4 Vocational/technical training other than formal vocational/technical training

(a) ***Hereditary*:** The expertise in a vocation or trade is sometimes acquired by the succeeding generations from the other members of the households, generally the ancestors. The expertise gained through significant 'hands-on' experience enables the individual to take up activities in self-employment capacity or makes them employable. Acquiring such marketable expertise by one, which enables him/her to carry out the trade or occupation of their ancestors over generations, was considered to be training through 'hereditary' sources.

(b) ***Self-learning*:** The expertise in a vocation or trade when acquired by a person through his/her own effort, without any training under any person or organisation, was considered as non-formal vocational training through 'self-learning'. For example, a person who learnt photography on his own effort was considered to have acquired the non-formal vocational training through 'self-learning'.

(c) ***Learning on the job*:** The expertise acquired by a person while in employment (current and/or past), either through informal training by the employer or organisation or through the exposure to the type of job that he/she is/was performing, was considered as the training through 'learning on the job'. Note that if a person was provided with formal training in a vocation or trade even by the employer or organisation, while in employment, he/she was considered to have received 'formal' vocational/technical training.

(d) ***Other*:** The 'other' sources included the cases where the expertise for a vocation or trade was developed even from the household members or ancestors, provided that the said vocation or trade was different from the one relating to their ancestors. Similarly, a person might have learnt tailoring work from a master tailor or a person may learn book-binding work from a printing press. All such expertise acquired was considered as vocational/technical training through 'other' sources.

2.6 Economic activity: The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included (i) production of all goods and services for market (i.e. for pay or profit) including those of government services, (ii) production of primary commodities for own consumption and (iii) own account production of fixed assets.

2.6.1 The full spectrum of economic activities as defined in the UN System of National Accounts was not covered in the definition of economic activities adopted for the Periodic Labour Force Survey (PLFS). Although production of any good for own consumption is considered as economic activity by UN System of National Accounts, production of only primary goods for own consumption was considered as economic activity by NSS for the purpose of the survey. While the former considers activities like own account processing of primary products as economic activities, processing of primary products for own consumption was not considered as economic activity for PLFS.

2.6.2 The term 'economic activity' as defined in the PLFS, therefore, included:

(i) all the market activities performed for pay or profit which result in production of goods and services for exchange.

(ii) of the non-market activities,

(a) all the activities relating to the agriculture, forestry, fishing, mining and quarrying sector (i.e. industry Divisions 01 to 09 of NIC-2008) which result in production of primary goods for own consumption (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.)

and

(b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

The activities like prostitution, begging, etc., which might result in earning, were not considered as economic activities for the survey.

2.7 Activity status: It is the activity situation in which a person was found during a specified reference period with regard to the person's participation in economic and non-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during the reference period:

(i) working or being engaged in economic activity (work),

(ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and

(iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and ‘unemployment’, respectively.

2.7.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person during the reference period. In such an eventuality, unique identification under any one of the three broad activity statuses (viz. employed/ unemployed/not in labour force) was done by adopting either *the major time criterion* or *priority criterion.* The former was used for classification of persons according to the usual status approach and the latter for classification of persons according to the current status approach (i.e., current weekly status and current daily status approaches).

Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity in terms of status and industry was considered as that one corresponding to which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activity.

2.7.2 The detailed activity statuses under each of the three broad activity statuses (viz. ‘employed’, ‘unemployed’ and ‘not in labour force’) and the corresponding codes used in the survey are given below:

code description

working (or employed)

self-employed

11 worked in household enterprises (self-employed) as own-account worker
12 worked in household enterprises (self-employed) as an employer
21 worked in household enterprises (self-employed) as helper
61 did not work owing to sickness though there was work in household enterprise
62 did not work owing to other reasons though there was work in household enterprise

regular wage/ salaried employee

31 worked as regular wage/salaried employee
71 did not work owing to sickness but had regular salaried/wage employment
72 did not work owing to other reasons but had regular salaried/wage employment

casual labour

41 worked as casual labour in public works other than MGNREG public works
42 worked as casual labour in Mahatma Gandhi NREG public works

51 worked as casual labour in other types of works

not working but seeking/available for work (or unemployed)

81 sought work or did not seek but was available for work (for usual status approach)
81 sought work (for current weekly status approach)
82 did not seek but was available for work (for current weekly status approach)

neither working nor available for work (or not in labour force)

91 attended educational institutions
92 attended to domestic duties only
93 attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
94 rentiers, pensioners, remittance recipients, etc.
95 not able to work owing to disability
97 others (including beggars, prostitutes, etc.)
98 did not work owing to sickness (for casual workers only)
99 children of age 0-4 years

It may be noted that codes 42, 61, 62, 71, 72, 82 and 98 were applicable for current status only. It may also be noted that activity status code 41 in the usual status is used for casual labour in all types of public works, whereas in the current activity status, code 41 is for casual labour in public works other than MGNREG public works and code 42 is for casual labour in MGNREG public works.

2.8 Workers (or employed*)*: Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid household members who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 72 were assigned for workers. Workers were further categorized as *self-employed (*relevant activity status codes: 11, 12, 21, 61, 62*), regular wage /salaried employee (*relevant activity status codes: 31, 71, 72*),*and *casual labour (*relevant activity status codes: 41, 42 and 51*).*

2.9 Seeking or available for work (or unemployed): Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

2.10 Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 – 82 constituted the labour force.

2.11 Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labours not working due to sickness. Activity status codes 91-95, 97,98 and 99 were assigned for persons belonging to category 'not in labour force'.

2.12 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise.

***2.12.1 Categories of self-employed persons*:** Self-employed persons were further categorised as follows:

(i) ***own-account workers***: Self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour were considered as own-account workers. They could, however, have had unpaid helpers to assist them in the activity of the enterprise.

(ii) ***employers***: Self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour were considered as employers.

(iii) ***helpers in household enterprise***: Self-employed persons who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed were considered as helpers in household enterprise. They did not run the household enterprise on their own but assisted the concerned person living in the same household in running the household enterprise.

2.13 Regular wage/salaried employee: These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.14 Casual labour: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was considered as a casual labour.

2.15 Public works: 'Public works' were those activities which were sponsored by Government or Local Bodies, and which cover local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programmes such as Mahatma Gandhi National Rural Employment Guarantee (MGNREG) works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc.The coverage of schemes under 'public works' is restricted to those schemes under poverty alleviation programmes, or relief measures through which the Government generated wage employment. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, digging of irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc.There may be some schemes sponsored by the Government and in operation, which were conceived as self-employment generation schemes. Some such schemes of the Government were Swarnjayanti Gram Swarozgar Yojana (schemes under erstwhile IRDP merged with this), Rural Employment Generation Programme (REGP), Prime Minister's Rozgar Yojana (PMRY), Valmiki Ambedkar Awas Yojana (VAMBAY), etc. Employment generated through these schemes was not considered within the purview of 'public works'.Classification of individuals as 'casual labour in *public works*' required that the work in which they participatedwas '*public works*' as defined above. To distinguish between *'public works'* and works not classifiable as *'public works'*, some broad characteristics of '*public works'* were identified,viz. the primary objective was generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives. It is to be noted that for assigning current weekly and current daily activity status codes for the casual labour working in public works, codes 41 and 42 were used as follows:

(i) worked as casual labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 41
(ii) worked as casual labour in Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 42

In the usual activity status, code 41 was used for casual labour in public works, which included all types of public works and code 42 was not applicable in the usual activity status.

2.16 Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA): The Mahatma Gandhi National Rural Employment Guarantee Act, 2005 (MGNREGA) is an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. According to this Act, Rural Employment Guarantee Schemes (REGS) are formed by the State Governments. The Scheme provides at least 100 days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Adult means a person who has completed his/ her eighteen years of age. Unskilled manual work means any physical work which any adult person is capable of doing without any special skill/ training. The implementing agency of the

scheme may be any Department of the Central Government or a State Government, a Zila Parishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government.

2.17 Different approaches for determining activity status: In the labour force surveys, the activity status of a person is determined on the basis of the activities pursued by the person during certain specified reference period. The activity status determined on the basis of the reference period of last 365 days preceding the date of survey is known as the usual activity status of the person, that determined on the basis of a reference period of last 7 days preceding the date of survey is known as the current weekly status (CWS) of the person and the activity status determined for each day of the reference week which is known as the current daily status (CDS) of the person. For the PLFS, activity status was collected for all the three reference periods mentioned above, viz., last 365 days for usual status, using a reference period of 7 days preceding the date of the survey for current weekly status and each day of the reference week for current daily status.

2.17.1 Identification of each individual into a unique situation poses a problem when more than one of three types of broad activity status viz. 'employed', 'unemployed' and 'not in labour force' is concurrently obtained for a person. In such an eventuality, unique identification under any one of the three broad activity statuses was done by adopting either the major time criterion or priority criterion. The former was used for classification of persons under 'usual activity status' and, the latter, for classification of persons under 'current weekly status' and 'current daily status'. If, by adopting one of these two criteria, a person categorised as engaged in economic activity was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status category related to the activity in which relatively more time was spent. Similar approach was adopted for non-economic activities also.

***2.17.2 Usual activity status*:** The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (major time criterion) during the 365 days preceding the date of survey was considered the *usual principal activity status* of the person. To decide the usual principal activity of a person, he/ she was first categorised as belonging to the labour force or not, during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work'. For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but seeking and/ or available for work' was then ascertained again on the basis of the relatively long time spent in the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such activity was determined again on the basis of the 'relatively long time spent' criterion.

***2.17.3 Subsidiary economic activity status*:** Usual principal status of a person was determined as the status on which the person spent relatively long time (major time criterion) during the 365

days preceding the date of survey. Such persons might have also pursued, in addition to his/her usual principal status, some economic activity for 30 days or more during the reference period of 365 days preceding the date of survey. The status in which such economic activity was pursued during the reference period of 365 days preceding the date of survey was the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, the major activity and status based on the 'relatively long time spent' criterion was considered. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

(i) a person may be engaged for a relatively long period during the 365 days in an economic (a non-economic activity) and for a relatively small period, which is not less than 30 days, in another economic activity (any economic activity).

(ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for relatively small period in a subsidiary capacity. In such cases, since both the activities were being pursued throughout the year and the duration of both the activities is more than 30 days, the activity which was being pursued for a relatively small period was considered as his/ her subsidiary activity.

2.17.4Current weekly activity status (CWS): The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided **on the basis of a certain priority cum major time criterion**. According to the priority criterion, the status of 'working' gets priority over the status of 'not working but seeking or available for work', which in turn gets priority over the status of 'neither working nor available for work'. *A person is considered working (or employed)) if he/ she worked for at least one hour on at least one day during the 7 days preceding the date of survey or if he/she had work for at least 1 hour on at least one day during the 7 days preceding the date of the survey but did not do the work.* A person is considered 'seeking or available for work (or unemployed)' if during the reference week no economic activity was pursued by the person but he/ she made efforts to get work or had been available for work for at least one hour on any day during the reference week. A person who had neither worked nor was available for work any time during the reference week, is considered to be engaged in non-economic activities (or not in labour force). Having decided the broad current weekly activity status of a person on the basis of 'priority' criterion, the detailed current weekly activity status is again decided on the basis of 'major time' criterion if a person was pursuing multiple economic activities.

2.17.5 Current daily activity status (CDS): The current daily activity status for a person is determined on the basis of his/ her activity status on each day of the reference week using a priority-cum-major time criterion. As mentioned earlier, according to the priority criterion, the status of 'working' gets priority over the status of 'not working but seeking or available for work', which in turn gets priority over the status of 'neither working nor available for work'. The following points were used for determining the current daily status of a person:

i) If on a day, a person '*had actually worked for 1 hour or more*' or '*had work for 1 hour or more but did not do the work*', he was given work status code.
ii) For each day at most two economic activities (work activities) were recorded.
iii) Economic activities were differentiated at *status* x *2-digit of NIC-2008*.
iv) If a person was not engaged in 'work' even for 1 hour on a day, only one status code relevant for unemployment status or out of labour force status, as the case may be was recorded using a priority-cum-major time criteria.

2.18 In the of PLFS, the current weekly activity status of a person is derived from the information on hours worked in the different activities of a person during 7 days of the reference week.

2.19 Industry and occupation of the work activity: For the workers (employed persons), to record the industry of work, 5-digit classification of NIC-2008 was used and to record the type of occupation, 3-digit classification of NCO-2015 was used. To identify certain category of workers under Division 97 (Activities of households as employers of domestic personnel) of NIC-2008, eight additional codes were used in the survey viz., housemaid /servant (97001), cook (97002), gardener (97003), gatekeeper/chowkidar/watchman (97004), governess/baby-sitter (97005), tutor (97006), driver (97007) and 'others' (97009). Broad structure of NIC-2008 (Sections and Divisions) and description of occupation divisions/sub-divisions of NCO-2015 have been presented at the end of this Appendix in **Annexure I** and **Annexure II**, respectively.

2.20 Hours actually worked: 'Hours actually worked' for a person was obtained in the line of the concept of '*hours actually worked'* as defined by ILO in its 18th ICLS (International Conference of Labour Statisticians) and in consideration of the production boundary followed in PLFS to define the economic activities.

2.20.1 'Hours actually worked' by a person on a day is the total time spent by the person on that day towards production of all goods and services that are considered as economic activities. It included (i) the hours spent directly on production activity, (ii) hours related to the production activity i.e., hours required to maintain, facilitate or enhance productive activities, (iii) hours accounted for unavoidable 'in-between time' in the course of production process when the person continues to be available for work such as work or machinery breakdown or accident or lack of supplies etc., (iv) hours allowed for short rest or refreshment. All other time that had not been involved for work, even if paid for, was excluded. The production activity performed in any location (in the economic territory/ establishment, on the street, at home, elsewhere away from usual work location) was considered for getting hours actually worked.

2.20.2 Therefore, hours actually worked included
(i) hours spent directly on production:
  (a) hours worked during normal periods of work;
  (b) hours worked in addition to normal periods of work (such as overtime);
(ii) hours related to the production activity:

(a) time spent at the place of work for preparation of the workplace, repairs and maintenance, preparation and cleaning of tools, and the preparation of receipts, time sheets and reports etc.,
(b) time spent for purchasing raw or basic materials or resale goods, transporting products to/from the market, source or home,
(c) time spent for waiting for business, customers, patients, on-call duty,
(d) time spent for travelling between work locations, to reach field projects, fishing areas, assignments, conferences or to meet clients (such as door-to-door vending), patients,
(e) time spent for receiving training to acquire new skills or techniques and for upgrading or enhancement of skills for jobs in the economic unit, at or away from the work location,

(iii) Time spent at the place of work when persons could not work for reasons such as lack of supply of work, breakdown of machinery or accidents, but continued to be available for work. This 'in-between time' is unavoidable or inherent to the job and involves temporary interruptions of a technical, material or economic nature.

(iv) Time spent for short periods of rest, relief or refreshment at the work place including tea, coffee etc.,

and hours actually worked excluded

(i) hours not worked, irrespective of payment, such as weekly holidays, annual leave, public holidays, sick leave, parental (maternity/paternity) leave, other leave for personal or family reasons, etc.,
(ii) time spent on travel from home to work and vice versa,
(iii) time spent for longer breaks such as meal breaks when no productive activity is performed, even when paid by the employer,
(iv) time spent in educational activity not intended for the economic unit even when authorized, paid or provided by the employer.

2.20.3 Determination of hours actually worked for self-employed persons in some specific cases*:* Many of the self-employed persons have atypical ways of working, for example those engaged in agricultural activities, fisheries or a shop owner. For collecting information on hours actually worked by the self-employed persons, following points were considered:

(a) For determination of the actual hours of work for these categories of workers, the basic criterion followed was whether they were available for the work to be performed. The availability criterion was judged by considering whether they were ready to receive order or attend to clients or to perform the economic activities.
(b) However, period of absence from work was excluded. Absence from work mightbe due to illness, occupational injury, leave or care for dependants (including the elderly) and other types of absence due to personal reasons. Besides, periods of absence affecting or stemming from the economic unit, workplace or establishment for technical or economic reasons, strike activity, by bad weather, werealso

excluded. The absence from work might be due to economic reasons such as reduction in activity.

(c) When the economic activity in which the person was engaged did not require actual working for production purpose, such periods were excluded from the count of hours actually worked.

(d) Thus, the period during which the self-employed persons were actually absent from work was excluded from the calculation of hours actually worked.

2.21 Hours would have worked: The 'hours would have worked' related to the hours the person would have worked had he worked in the economic activity from which the person was temporarily off.

2.22 Earnings of the regular salaried/wage employees and casual labours: For collecting information on earning of 'regular salaried/wage employees' and 'casual labours', following points were taken into consideration:

(a) Earnings of the regular salaried/wage employees and casual labours relates to remuneration in cash and in kind which were paid, as a rule at regular intervals, for time worked (including overtime payments) or work done together with remuneration for time not worked, such as for annual vacation, other paid leave or holidays.

(b) It relates to employees' gross remuneration, i.e. the total before any deductions were made by the employer in respect of taxes, contributions of employees to social security and pension schemes, life insurance premiums and other obligations of employees.

(c) Earnings exclude employers' contributions paid to social security and pension schemes in respect of their employees and also the benefits received by employees under these schemes.

(d) Earnings also exclude severance and termination pay.

(e) The wages in kind were evaluated at the respective current retail price.

(f) Bonus (expected or paid) was duly apportioned for the reference period for inclusion in earnings.

2.23 Gross earnings of self-employed persons: The gross earnings of the self-employed persons during a reference period was derived by the procedure stated below:

(a) Gross earnings of the self-employed persons during a reference period was obtained by deducting total expenses from the gross output of that period.

(b) The gross output corresponds to the sum of the values of all goods and services produced during the reference period, including any part which has been retained for own consumption or given free of charge or at reduced prices to hired labour.

(c) The valuation of output was made at basic price. The basic price is defined as the amount receivable by the producer from the purchaser for a unit of good or service produced as output minus any tax payable on product (like, excise duties, sales tax, non-deductable vat etc.) plus any subsidy receivable on the product for selling those to the ultimate consumer at lesser price.

(d) Total expenses include (i) current expenses of the enterprise, such as purchase of raw materials, tools and equipment, fuel, electricity, etc., (ii) payments to hired labour, (iii) rent paid for fixed capital items and interest payments on financial assets, (iv) taxes on production (like, recurrent taxes on land & buildings, business or professional licence fees, road tax, registration fee of vehicles etc.) paid by the enterprise, reduced by subsidies received on production (like, employing physically challenged persons, installing pollution control equipment etc.).

(e) Thus, gross earning = gross output – total expenses

(f) If the owners of the enterprise are from the same household, earning was judged by considering equal distribution of income among all the owners. If the owners of the enterprise were from the different households, earning from the partnership business was be distributed, according to the agreement (verbal or written), among the partner households.

(g) For helpers in household enterprises, gross earnings was considered as zero (0).

2.24 Enterprise: An enterprise is an undertaking which is engaged in the production and/ or distribution of some goods and/ or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household, or by several households jointly, or by an institutional body.

2.25 Household Enterprise: A household enterprise is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise is located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises are household enterprises.

2.26 Definitions of various types of enterprises:

(i) ***Proprietary*:** When an individual is the sole owner of an enterprise it is a proprietary enterprise. Own account production of fixed assets for own use, when produced by a single member, will be classified as proprietary enterprise.

(ii) ***Partnership*:** Partnership is defined as the 'relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all'. There may be two or more owners, belonging to the same or different households, on a partnership basis, with or without formal registration (where there is a tacit understanding about the distribution of profit among the so-called partners). Own account production of fixed assets, when produced by two or more members belonging to the same or different households was classified as partnership enterprises. Thus, own account production of fixed assets by a group of households for community use was classified as partnership enterprise.

(iii) ***Government/Local Body***: Government/local body included Government administrative departments of both the Central and State Governments, local bodies of rural and urban areas and Departmental Enterprises like Indian Railways, Department of Post, etc.

(iv) ***Public Sector Enterprises***: Public Sector Enterprises included government companies and subsidiaries of government companies and statutory corporations set up under special enactments of Parliament or State Legislatures. Some of these are Damodar Valley Corporation, Food Corporation of India, Airports Authority of India, Road Transport Corporations, Warehousing Corporations, Electricity Boards, etc. Some of the financial enterprises included the nationalised banks, Central and State financial corporations, LIC, GIC, Employees State Insurance Corporation (ESIC), etc. The non-financial public sector enterprises consisted of all the undertakings/ enterprises of central, state, union territory governments and local authorities under the industry groups agriculture, forestry and logging, fishing, mining, manufacturing, electricity and gas, road, air and water transport including port trusts, storage and warehousing, trade, hotels & restaurants and other services.

(v) ***Autonomous Bodies***: Autonomous Bodies are mostly set up by an Act of Parliament/Assembly or registered under Societies Registration Act. However, they are separate from Government Administrative Departments as they enjoy certain degree of autonomy in their day to day functioning. They receive grants from Government in addition to their own resources. Further, these are engaged in non-market production. Some of the autonomous bodies are: All India Institute of Medical Sciences, Indian Institute of Technology, Indian Statistical Institute, Housing Boards, Development Boards, Pollution Control Boards etc.

(vi) ***Public Limited Company*****:** A public limited company is defined as a company that is not a private company. As such public companies can have an unlimited number of members and can invite the public to subscribe to its shares and debentures. The minimum number of members required to form a public limited company is seven.

(vii) ***Private Limited Company*****:** Private limited company means a company which by its articles:

(a) restricts the right to transfer its shares, if any,

(b) limits the number of its members to two hundred not including-

(i) persons who are in the employment of the company, and

(ii) persons who, having been formerly in the employment of the company, were members of the company while in that employment and have continued to be members after the employment ceased; and

(c) prohibits any invitation to the public to subscribe for any share in, or debentures of, the company.

[Where two or more persons hold jointly one or more shares in a company, they shall, for the purpose of this definition, be treated as a single member.]

(viii) ***Co-operative Societies*****:** Co-operative society is one that is formed through the co-operation of a number of persons, recognised as members of the society, to benefit themselves. In the process, the funds are raised by members' contributions/investments and the profits generated out of the society's activities are shared by the members. The government itself in a government

agency can also be a member or shareholder of a registered co-operative society but this fact cannot render the society into a public sector enterprise for the purpose of this survey.

(ix) ***Trust*:** An arrangement through which one set of people, the trustees, are the legal owners of property which is administered in the interest of another set, the beneficiaries. Trusts may be set up to provide support for individuals or families, to provide pensions, to run charities, to liquidate the property of the bankrupts for the benefit of their creditors, or for the safe keeping of securities bought by trusts with their investor's money. The assets, which trusts hold are regulated by law, must be administered in the interests of the beneficiaries, and not for the profit of the trustees.

(x) ***Non-Profit Institutions (NPI)*:** NPIs are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but any surpluses they happen to make cannot be appropriated by other institutional units. The articles of association by which they are established are drawn up in such a way that the institutional units which control or manage them are not entitled to a share in any profits or other income which they receive.

2.27 Type of job contract: For each employee in the usual status, it was ascertained whether there was any *written contract or agreement* with his/her employer in respect of duration of employment for the job he/she was engaged. For those who reported to have written job contract with their employer, further probing was done in respect of the length of duration contracted, viz., *for 1 year or less*, *for more than 1 year to 3 years* and *more than 3 years*. If the contract of employment specified a particular date of termination which was more than 3 years or if the type of job contracted was such that no time was fixed but the contract could only be terminated for certain administrative reasons such as incompetence, misconduct or for economic reasons then the contract was considered to have a duration of 3 years or more. However, if no written contract existed, then irrespective of the duration of employment, it was considered as no written job contract.

2.28 Eligibility of paid leave: For the employees in the usual status, it was ascertained whether they were eligible to get paid leave. Paid leave included leave during sickness, maternity, or such leave, as an employee was eligible to take without loss of pay, as per the conditions of employment. The situation was assessed excluding the paid off-days/holidays, which an enterprise normally allows to its employees. Employees were classified as those with eligibility for paid leave and those without eligibility for paid leave.

2.29 Availability of social security benefits: For the employees in the usual status, it was ascertained whether they were covered under any of the specified social security benefits or a combination of them which are arranged by the employer or for which contribution is made by the employer. For the purpose of the survey the following schemes were considered as social security benefits:

only PF/ pension (i.e., GPF, CPF, PPF, pension, etc.).
only gratuity
only health care & maternity benefits
only PF/ pension and gratuity
only PF/ pension and health care & maternity benefits.
only gratuity and health care & maternity benefits
PF/ pension, gratuity and health care & maternity benefits

Those who were not covered under any of the above social security schemes were considered as not eligible for any social security benefits.

2.29.1 The term Provident Fund (PF) included General Provident Fund, Contributory Provident Fund, Public Provident Fund, Employees Provident Fund, etc. It may be mentioned that coverage under any of these social security schemes meant that the employer contributed/ arranged/ paid in implementing the social security benefits for the worker. If an employee operated, in his/ her individual capacity, a PPF account and the employer is not contributing in that account then it was not considered as a social security benefit. On the contrary, a scheme, in which both the employee and the employer contributed, was considered a social security benefit. When benefits were given by the employer for treatment of illness/ injury or an employee was eligible for paid leave for a specified period of pre-natal/ childbirth/ post-natal stages or the expenditure for maternity care or childbirth was borne by the employer as per the conditions of employment, then such benefits were considered as health care & maternity benefits. There were cases where the employer was not directly contributing in a social security scheme for the employees, but being the member of the welfare association or organization or scheme in relation to the specific activity carried out by the employer, the employees got the benefit from that welfare association/ organization/ scheme. Such cases were also considered as social security benefits availed through the employer.

2.30 Guidelines of International Conference of Labour Statisticians (ICLS) on informal sector and informal employment: Broad guideline regarding the concept of informal sector and informal employment as enunciated in the 15th International Conference of Labour Statisticians (ICLS) and 17th ICLS, are given below. Extracts of the resolutions and guidelines concerning informal sector and informal employment are given in **Annexure III** and **Annexure IV** respectively, at the end of this Appendix.

2.30.1 As per 15th ICLS, the *informal sector* is broadly characterized as consisting of:

(a) units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at a low level of organization, with little or no division between labour and capital as factors of production and on a small scale. Labour relations - where they exist - are based mostly on casual employment, kinship or personal and social relations rather than contractual arrangements with formal guarantees.

(b) production units of the informal sector have the characteristic features of household enterprises. The fixed and other assets used do not belong to the production units as such but to their owners. The units as such cannot engage in transactions or enter into contracts with other units, nor incur liabilities, on their own behalf. The owners have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligations incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. Similarly, capital goods such as buildings or vehicles may be used indistinguishably for business and household purposes.

Thus, for statistical purposes, the *informal sector*, as per guidelines of 15th ICLS is regarded as a group of production units which, according to the definitions and classifications provided in the United Nations System of National Accounts, forms part of the household sector as household enterprises or, equivalently, unincorporated enterprises owned by households.

2.30.2 According to the 17th ICLS framework, *informal employment* is identified by jobs classified by status of employment of the workers and the types of production units in which they were employed. The different types of production units are: (a) *formal sector enterprises,* (b) *informal sector enterprises, and* (c) *households which produce goods for their own final use and/or those employing domestic workers*. The status of employment of the workers performing the jobs may be (a) *own account workers*, (b) *employers*, (c) *contributing family workers*, (d) *employees*, or (e) *member of informal producers' co-operatives*. The employment may be considered as formal or informal depending upon the type of enterprises in which the workers are engaged or the nature of work they perform.

The *informal employment* comprises jobs held by:

- own-account workers and employers who have their own informal sector enterprises;
- contributing family workers, irrespective of whether they work in formal or informal sector enterprises;
- employees who have informal jobs (for definition, see item (5) in paragraph **3** in Annexure IV) whether employed by formal sector enterprises, informal sector enterprises, or as paid domestic workers by households;
- members of informal producers' cooperatives; and
- persons engaged in the own-account production of goods exclusively for own final use by their household, such as subsistence farming or do-it-yourself construction of own dwellings.

2.31 Informal sector and conditions of employment in PLFS: In this Report, estimates of percentage of workers in different types of enterprises are presented in respect of workers engaged in non-agriculture sector (industry divisions 05-99 of NIC-2008). It may be noted that *proprietary and partnership* enterprises are classified as informal sector enterprises. Besides, percentage of regular wage/ salaried employees in usual status (ps+ss) in non-agriculture sector under different conditions of conditions of employment (such as without written job contract, not eligible for paid leave, without any social security benefit, etc) are also presented.

2.32 ***Social group***: For each household surveyed, the social group to which the head of the household belonged to was recorded. The social group of the head of the household was considered as the social group of all the members of the household irrespective of the actual social group to which the individual members belonged. In the survey, information was collected in respect of four social groups viz. *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and the rest referred to as *others*. The information recorded in this regard was based entirely on the response of the informant and not based on any state or central level list of the social group.

2.33 Religious group: For each household surveyed, the reported religion of the head of the household was considered as the religion of *all* the members of the household irrespective of the actual religion followed by individual members. Seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism were explicitly considered for data collection as a part of the household characteristics. The information recorded in this regard was based entirely on the response of the informant.

2.34 Conceptual Framework of Key Employment and Unemployment Indicators: From the Periodic Labour Force Survey (PLFS), the Key employment and unemployment Indicators viz. LFPR, WPR, PU and UR are derived. The definitions of these indicators are as follows:

1. ***Labour force participation rate (LFPR):*** LFPR is defined as the percentage of persons in the labour force in the population.
2. ***Worker Population Ratio (WPR)****:* WPR is defined as the percentage of employed persons in the population.
3. ***Proportion Unemployed (PU)****:* It is defined as the percentage of persons unemployed in the population.
4. ***Unemployment Rate (UR)****:* UR is defined as the percentage of persons unemployed among the persons in the labour force.

2.34.1 The architecture of key labour force indicators is given below in tabular form:

<table>
<tr><th colspan="2">activity profile</th><th rowspan="2">key indicators</th></tr>
<tr><th>activity status(code)</th><th>category of persons</th></tr>
<tr><td>11, 12, 21, 31, 41, 42, 51, 61, 62, 71, 72</td><td>workers</td><td rowspan="3">1. Labour Force Participation Rate (LFPR):
$\frac{no.\ of\ employed\ persons + no.of\ unemployed persons}{total\ population} * 100$
2. Worker Population Ratio (WPR): $\frac{no.\ of\ employed\ persons}{total\ population} * 100$
3. Proportion Unemployed (PU):
$\frac{no.of\ unemployed persons}{total\ population} * 100$
4. Unemployment Rate (UR):
$\frac{no.of\ unemployed persons}{no.\ of\ employed\ persons + no.of\ unemployed persons} * 100$</td></tr>
<tr><td>81, 82</td><td>unemployed</td></tr>
<tr><td>91, 92 93, 94, 95, 97, 98, 99</td><td>not in labour force</td></tr>
<tr><td colspan="3">Note: Activity status codes, 42, 61, 62, 71, 72, 82, and 98 are used only in the current status and the remaining activity status codes are used in both usual status and in current status</td></tr>
</table>

2.35 Mechanism adopted for generating worker estimates in absolute terms

The Worker Population Ratio (WPR) estimates in usual status (ps+ss) obtained from PLFS have been applied to the projected population made available by the Ministry of Health and Family Welfare (MoHFW) to generate the worker estimates in absolute terms.

For the generation of the worker estimates, the following calculation steps have been followed:

(i) The projected population figure, as available, for all ages (0+) as on 1st July 2025 from the MoHFW report, gender-wise separately for urban areas and total (i.e., rural and urban areas combined), has been considered. The gender-wise population projections for all ages (0+) for rural areas have been obtained by subtracting the urban figures from the total population projected.

(ii) Using the sampling weights from PLFS, the population proportion of male and female of age 15 years and above among the total population is worked out for rural and urban sectors.

(iii) The proportion obtained from step (ii) is applied over the population projections disaggregated by gender and sector to arrive at respective population projections of age 15 years and above. The persons surveyed who have reported their gender as transgender have not been considered for the projection exercise, as a separate population projection for this gender category is not available in the MoHFW report.

(iv) The Worker Population Ratio (WPR) in usual status (ps+ss) for male and female of age 15 years and above is applied on the projected population of age 15 years and above [arrived following step (iii)] to generate estimates of the workers in absolute terms separately for gender and sector categories. These component-wise worker estimates are combined to arrive at the overall estimates.

ANNEXURE I

BROAD STRUCTURE of NIC -2008 (SECTIONS AND DIVISIONS)

Section A: Agriculture, forestry and fishing

Division 01: Crop and animal production, hunting and related service activities
Division 02: Forestry and logging
Division 03: Fishing and aquaculture

Section B: Mining and quarrying

Division 05: Mining of coal and lignite
Division 06: Extraction of crude petroleum and natural gas
Division 07: Mining of metal ores
Division 08: Other mining and quarrying
Division 09: Mining support service activities

Section C: Manufacturing

Division 10: Manufacture of food products
Division 11: Manufacture of beverages
Division 12: Manufacture of tobacco products
Division 13: Manufacture of textiles
Division 14: Manufacture of wearing apparel
Division 15: Manufacture of leather and related products
Division 16: Manufacture of wood and products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials
Division 17: Manufacture of paper and paper products
Division 18: Printing and reproduction of recorded media
Division 19: Manufacture of coke and refined petroleum products
Division 20: Manufacture of chemicals and chemical products
Division 21: Manufacture of pharmaceuticals, medicinal chemical and botanical products
Division 22: Manufacture of rubber and plastics products
Division 23: Manufacture of other non-metallic mineral products
Division 24: Manufacture of basic metals
Division 25: Manufacture of fabricated metal products, except machinery and equipment
Division 26: Manufacture of computer, electronic and optical products
Division 27: Manufacture of electrical equipment
Division 28: Manufacture of machinery and equipment n.e.c.
Division 29: Manufacture of motor vehicles, trailers and semi-trailers
Division 30: Manufacture of other transport equipment
Division 31: Manufacture of furniture
Division 32: Other manufacturing
Division 33: Repair and installation of machinery and equipment

Section D: Electricity, gas, steam and air conditioning supply
Division 35: Electricity, gas, steam and air conditioning supply

Section E: Water supply; sewerage, waste management and remediation activities

Division 36: Water collection, treatment and supply
Division 37: Sewerage
Division 38: Waste collection, treatment and disposal activities; materials recovery
Division 39: Remediation activities and other waste management services

Section F: Construction

Division 41: Construction of buildings
Division 42: Civil engineering
Division 43: Specialized construction activities

Section G: Wholesale and retail trade; repair of motor vehicles and motorcycles

Division 45: Wholesale and retail trade and repair of motor vehicles and motorcycles
Division 46: Wholesale trade, except of motor vehicles and motorcycles
Division 47: Retail trade, except of motor vehicles and motorcycles

Section H: Transportation and storage

Division 49: Land transport and transport via pipelines
Division 50: Water transport
Division 51: Air transport
Division 52: Warehousing and support activities for transportation
Division 53: Postal and courier activities

Section I: Accommodation and Food service activities

Division 55: Accommodation
Division 56 Food and beverage service activities

Section J: Information and communication

Division 58: Publishing activities
Division 59: Motion picture, video and television programme production, sound recording and music publishing activities
Division 60: Broadcasting and programming activities
Division 61: Telecommunications
Division 62: Computer programming, consultancy and related activities
Division 63: Information service activities

Section K: Financial and insurance activities

Division 64: Financial service activities, except insurance and pension funding
Division 65: Insurance, reinsurance and pension funding, except compulsory social security

Division 66: Other financial activities

Section L: Real estate activities

Division 68: Real estate activities

Section M: Professional, scientific and technical activities

Division 69: Legal and accounting activities
Division 70: Activities of head offices; management consultancy activities
Division 71: Architecture and engineering activities; technical testing and analysis
Division 72: Scientific research and development
Division 73: Advertising and market research
Division 74: Other professional, scientific and technical activities
Division 75: Veterinary activities

Section N: Administrative and support service activities

Division 77: Rental and leasing activities
Division 78: Employment activities
Division 79: Travel agency, tour operator and other reservation service activities
Division 80: Security and investigation activities
Division 81: Services to buildings and landscape activities
Division 82: Office administrative, office support and other business support activities

Section O: Public administration and defence; compulsory social security

Division 84: Public administration and defence; compulsory social security

Section P: Education

Division 85: Education

Section Q: Human health and social work activities

Division 86: Human health activities
Division 87: Residential care activities
Division 88: Social work activities without accommodation

Section R: Arts, entertainment and recreation

Division 90: Creative, arts and entertainment activities
Division 91: Libraries, archives, museums and other cultural activities
Division 92: Gambling and betting activities
Division 93: Sports activities and amusement and recreation activities

Section S: Other service activities

Division 94: Activities of membership organizations

Division 95: Repair of computers and personal and household goods

Division 96: Other personal service activities

Section T: Activities of households as employers; undifferentiated goods andservices producing activities of households for own use

Division 97: Activities of households as employers of domestic personnel

Division 98: Undifferentiated goods and servicesproducing activities of privatehouseholds for own use

Section U: Activities of extraterritorial organizations and bodies

Division 99: Activities of extraterritorial organizations and bodies

ANNEXURE – III

Resolution concerning statistics of employment in the informal sector, adopted by the Fifteenth International Conference of Labour Statisticians (January 1993)

[Extract]

Concept

5 (1) The informal sector may be broadly characterized as consisting of units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at a low level of organization, with little or no division between labour and capital as factors of production and on a small scale. Labour relations - where they exist - are based mostly on casual employment, kinship or personal and social relations rather than contractual arrangements with formal guarantees.

(2) Production units of the informal sector have the characteristic features of household enterprises. The fixed and other assets used do not belong to the production units as such but to their owners. The units as such cannot engage in transactions or enter into contracts with other units, nor incur liabilities, on their own behalf. The owners have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligations incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. Similarly, capital goods such as buildings or vehicles may be used indistinguishably for business and household purposes.

Operational definitions

Informal sector

6 (1) For statistical purposes, the informal sector is regarded as a group of production units which, according to the definitions and classifications provided in the United Nations System of National Accounts (Rev. 4), form part of the household sector as household enterprises or, equivalently, unincorporated enterprises owned by households as defined in paragraph 7.

(2) Within the household sector, the informal sector comprises (i) "informal own-account enterprises" as defined in paragraph 8; and (ii) the additional component consisting of "enterprises of informal employers" as defined in paragraph 9.

(3) The informal sector is defined irrespective of the kind of workplace where the productive activities are carried out, the extent of fixed capital assets used, the duration of the operation of the enterprise (perennial, seasonal or casual), and its operation as a main or secondary activity of the owner.

Household enterprises

7. According to the United Nations System of National Accounts (Rev. 4), household enterprises (or, equivalently, unincorporated enterprises owned by households) are distinguished from corporations and quasi-corporations on the basis of the legal organization of the units and the type of accounts kept for them. Household enterprises are units engaged in the production of goods or services which are not constituted as separate legal entities independently of the households or household members that own them, and for which no complete sets of accounts (including balance sheets of assets and liabilities) are available which would permit a clear distinction of the production activities of the enterprises from the other activities of their owners and the identification of any flows of income and capital between the enterprises and the owners. Household enterprises include unincorporated enterprises owned and operated by individual household members or by two or more members of the same household as well as unincorporated partnerships formed by members of different households.

Informal own-account enterprises

8 (1) Informal own-account enterprises are household enterprises (in the sense of paragraph 7) owned and operated by own-account workers, either alone or in partnership with members of the same or other households, which may employ contributing family workers and employees on an occasional basis, but do not employ employees on a continuous basis and which have the characteristics described in subparagraphs 5 (1) and (2).

(2) For operational purposes, informal own-account enterprises may comprise, depending on national circumstances, either all own-account enterprises or only those which are not registered under specific forms of national legislation.

(3) Registration may refer to registration under factories or commercial acts, tax or social security laws, professional groups' regulatory acts, or similar acts, laws, or regulations established by national legislative bodies.

Enterprises of informal employers

9 (1) Enterprises of informal employers are household enterprises (in the sense of paragraph 7) owned and operated by employers, either alone or in partnership with members of the same or other households, which employ one or more employees on a continuous basis and which have the characteristics described in subparagraphs 5 (1) and (2).

(2) For operational purposes, enterprises of informal employers may be defined, depending on national circumstances, in terms of one or more of the following criteria:

(i) size of the unit below a specified level of employment;
(ii) non-registration of the enterprise or its employees.

(3) While the size criterion should preferably refer to the number of employees employed on a continuous basis, in practice, it may also be specified in terms of the total number of employees or the number of persons engaged during the reference period.

(4) The upper size limit in the definition of enterprises of informal employers may vary between countries and branches of economic activity. It may be determined on the basis of minimum size requirements as embodied in relevant national legislations, where they exist, or in terms of empirically determined norms. The choice of the upper size limit should take account of the coverage of statistical inquiries of larger units in the corresponding branches of economic activity, where they exist, in order to avoid an overlap.

(5) In the case of enterprises, which carry out their activities in more than one establishment, the size criterion should, in principle, refer to each of the establishments separately rather than to the enterprise as a whole. Accordingly, an enterprise should be considered to satisfy the size criterion if none of its establishments exceeds the specified upper size limit.

(6) Registration of the enterprise may refer to registration under specific forms of national legislation as specified in subparagraph 8 (3). Employees may be considered registered if they are employed on the basis of an employment or apprenticeship contract which commits the employer to pay relevant taxes and social security contributions on behalf of the employee or which makes the employment relationship subject to standard labour legislation.

10. For particular analytical purposes, more specific definitions of the informal sector may be developed at the national level by introducing further criteria on the basis of the data collected. Such definitions may vary according to the needs of different users of the statistics.

Population employed in the informal sector

11 (1) The population employed in the informal sector comprises all persons who, during a given reference period, were employed (in the sense of paragraph 9 of resolution I adopted by the Thirteenth International Conference of Labour Statisticians) in at least one informal sector unit as defined in paragraphs 8 and 9, irrespective of their status in employment and whether it is their main or a secondary job.

Treatment of particular cases

14. Household enterprises, which are exclusively engaged in non-market production, i.e. the production of goods or services for own final consumption or own fixed capital formation as defined by the United Nations System of National Accounts (Rev. 4), should be excluded from the scope of the informal sector for the purpose of statistics of employment in the informal

sector. Depending on national circumstances, an exception may be made in respect of households employing domestic workers as referred to in paragraph 19.

16. For practical reasons, the scope of the informal sector may be limited to household enterprises engaged in non-agricultural activities. With account being taken of paragraph 14, all non-agricultural activities should be included in the scope of the informal sector, irrespective of whether the household enterprises carry them out as main or secondary activities. In particular, the informal sector should include secondary non-agricultural activities of household enterprises in the agricultural sector if they fulfil the requirements of paragraphs 8 or 9.

17. Units engaged in professional or technical activities carried out by self-employed persons, such as doctors, lawyers, accountants, architects or engineers, should be included in the informal sector if they fulfil the requirements of paragraphs 8 or 9.

18 (1) Outworkers are persons who agree to work for a particular enterprise, or to supply a certain quantity of goods or services to a particular enterprise, by prior arrangement or contract with that enterprise, but whose place of work is not within any of the establishments, which make up that enterprise.

(2) In order to facilitate data collection, all outworkers should be potentially included in the scope of informal sector surveys, irrespective of whether they constitute production units on their own (self-employed outworkers) or form part of the enterprise, which employs them (employee outworkers). On the basis of the information collected, self-employed and employee outworkers should be distinguished from each other by using the criteria recommended in the United Nations System of National Accounts (Rev. 4). Outworkers should be included in the informal sector, or in the population employed in the informal sector, if the production units, which they constitute as self-employed persons or for which they work as employees fulfil the requirements of paragraphs 8 or 9.

19. Domestic workers are persons exclusively engaged by households to render domestic services for payment in cash or in kind. Domestic workers should be included in or excluded from the informal sector depending upon national circumstances and the intended uses of the statistics. In either case, domestic workers should be identified as a separate sub-category in order to enhance international comparability of the statistics.

ANNEXURE – IV

Guidelines concerning a statistical definition of informal employment, endorsed by the Seventeenth International Conference of Labour Statisticians (November-December 2003)

The Seventeenth International Conference of Labour Statisticians (ICLS),

Acknowledging that the relevance of informal employment varies among countries, and that a decision to develop statistics on it is therefore determined by national circumstances and priorities,

Noting that the term 'informal economy' is used by the ILO as including the informal sector as well as informal employment, and that as a supplement to the System of National Accounts 1993 an international conceptual framework for measurement of the non-observed economy already exists, which distinguishes the informal sector from underground production, illegal production, and household production for own final use,

Recalling the existing international standards on statistics of employment in the informal sector contained in the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS (January 1993),

Noting the recommendation made by the Expert Group on Informal Sector Statistics (Delhi Group), during its Fifth Meeting, that the definition and measurement of employment in the informal sector need to be complemented with a definition and measurement of informal employment,

Emphasizing the importance of consistency and coherence in relating the enterprise-based concept of employment in the informal sector to a broader, job-based concept of informal employment,

Considering the methodological work, which the International Labour Office and a number of countries have already undertaken in this area,

Supporting the request, which was made by the International Labour Conference in paragraph 37(n) of the Resolution concerning decent work and the informal economy adopted during its 90th Session (2002), that the International Labour Office should assist countries in the collection, analysis and dissemination of statistics on the informal economy,

Recognizing that the considerable diversity of informal employment situations poses limits to the extent to which statistics on informal employment can be harmonized across countries,

Realizing the usefulness of international guidelines in assisting countries in the development of national definitions of informal employment, and in enhancing the international comparability of the resulting statistics to the extent possible,

Endorses the following guidelines, which complement the Resolution concerning statistics of employment in the informal sector of the Fifteenth ICLS, and encourages countries to test the conceptual framework on which they are based.

1. The concept of informal sector refers to production units as observation units, while the concept of informal employment refers to jobs as observation units. Employment is defined in the sense of paragraph 9 of the Resolution concerning statistics of the economically active population, employment, unemployment and underemployment adopted by the Thirteenth ICLS.

2.*Informal sector enterprises* and e*mployment in the informal sector* are defined according to the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS. For the purpose of statistics on informal employment, paragraph 19 of the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS should be applied to exclude households employing paid domestic workers from informal sector enterprises, and to treat them separately as part of a category named 'households'.

3. (1) *Informal employment* comprises the total number of informal jobs as defined in subparagraphs (2) to (5) below, whether carried out in formal sector enterprises, informal sector enterprises, or households, during a given reference period.

(2) As shown in the attached matrix, informal employment includes the following types of jobs:

(i) own-account workers employed in their own informal sector enterprises (cell 3);
(ii) employers employed in their own informal sector enterprises (cell 4);
(iii) contributing family workers, irrespective of whether they work in formal or informal sector enterprises (cells 1 and 5);
(iv) members of informal producers' cooperatives (cell 8);
(v) employees holding informal jobs (as defined in subparagraph (5) below) in formal sector enterprises, informal sector enterprises, or as paid domestic workers employed by households (cells 2, 6 and 10);
(vi) own-account workers engaged in the production of goods exclusively for own final use by their household (cell 9), if considered employed according to paragraph 9 (6) of the Resolution concerning statistics of the economically active population, employment, unemployment and underemployment adopted by the Thirteenth ICLS.

(3) Own-account workers, employers, members of producers' cooperatives, contributing family workers, and employees are defined in accordance with the latest version of the International Classification of Status in Employment (ICSE).

(4) Producers' cooperatives are considered informal, if they are not formally established as legal entities and also meet the other criteria of informal sector enterprises specified in the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS.

(5) Employees are considered to have informal jobs if their employment relationship is, in law or in practice, not subject to national labour legislation, income taxation, social protection or entitlement to certain employment benefits (advance notice of dismissal, severance pay, paid annual or sick leave, etc.). The reasons may be the following: non-declaration of the jobs or the employees; casual jobs or jobs of a limited short duration; jobs with hours of work or wages below a specified threshold (e.g. for social security contributions); employment by unincorporated enterprises or by persons in households; jobs where the employee's place of work is outside the premises of the employer's enterprise (e.g. outworkers without employment contract); or jobs, for which labour regulations are not applied, not enforced, or not complied with for any other reason. The operational criteria for defining informal jobs of employees are to be determined in accordance with national circumstances and data availability.

(6) For purposes of analysis and policy-making, it may be useful to disaggregate the different types of informal jobs listed in paragraph 3 (2) above, especially those held by employees. Such a typology and definitions should be developed as part of further work on classifications by status in employment at the international and national levels.

4. Where they exist, employees holding formal jobs in informal sector enterprises (cell 7 of the attached matrix) should be excluded from informal employment.

5. *Informal employment outside the informal sector* comprises the following types of jobs:

(i) employees holding informal jobs (as defined in paragraph 3 (5) above) in formal sector enterprises (cell 2) or as paid domestic workers employed by households (cell 10);

(ii) contributing family workers working in formal sector enterprises (cell 1);

(iii) own-account workers engaged in the production of goods exclusively for own final use by their household (cell 9), if considered employed according to paragraph 9 (6) of the Resolution concerning statistics of the economically active population, employment, unemployment and underemployment adopted by the Thirteenth ICLS.

6. Countries, which do not have statistics on employment in the informal sector, or for which a classification of employment by type of production unit is not relevant, may develop statistics on informal employment, if desired, in specifying appropriate definitions of informal jobs of own-account workers, employers and members of producers' cooperatives. Alternatively, they may limit the measurement of informal employment to employee jobs.

7. Countries, which exclude agricultural activities from the scope of their informal sector statistics, should develop suitable definitions of informal jobs in agriculture, especially with respect to jobs held by own-account workers, employers and members of producers' cooperatives.

Conceptual Framework: Informal Employment

Production units by type	**Jobs by status in employment**								
	Own-account workers		Employers		Contrib-uting family workers	Employees		Members of producers' cooperatives	
	Informal	Formal	Informal	Formal	Informal	Informal	Formal	Informal	Formal
Formal sector enterprises					1	2			
Informal sector enterprises [(a)]	3		4		5	6	7	8	
Households[(b)]	9					10			

(a) As defined by the Fifteenth International Conference of Labour Statisticians (excluding households employing paid domestic workers).

(b) Households producing goods exclusively for their own final use and households employing paid domestic workers.

Note: Cells shaded in dark grey refer to jobs, which, by definition, do not exist in the type of production unit in question. Cells shaded in light grey refer to formal jobs. Un-shaded cells represent the various types of informal jobs.

Informal employment: Cells 1 to 6 and 8 to 10.
Employment in the informal sector: Cells 3 to 8.
Informal employment outside the informal sector: Cells 1, 2, 9 and 10.

Appendix D

Sample Design and Estimation Procedure

Appendix - D

Sample Design and Estimation Procedure

I. Introduction

Periodic Labour Force Survey (PLFS) of National Statistics Office

1. Since its launch in 2017, information collected in the Periodic Labour Force Survey (PLFS) conducted by National Statistics Office (NSO), MoSPI has been the primary source of statistics on labour force, activity participation of the population and structure of employment and unemployment in the country. These statistical indicators on labour market are required for planning, policy and decision making at various levels, both within and outside government and are also extensively used by various researchers.

2. PLFS was launched in 2017 essentially to address the following two objectives

   - to estimate the key employment and unemployment indicators (*viz.* Worker Population Ratio, Labour Force Participation Rate, Unemployment Rate) in the short time interval of three months for the urban areas only in the Current Weekly Status (CWS)
   - to estimate employment and unemployment indicators in both usual status (ps+ss) and CWS in both rural and urban areas annually

   Usual Status (ps+ss) and Current Weekly Status (CWS) refers to frameworks for determining activity status of person surveyed based on reference periods of last 365 days and last 7 days preceding the date of survey respectively.

3. The quarterly results of PLFS are brought out in the form of Quarterly Bulletins. Till 2024, twenty-five Quarterly Bulletins of PLFS corresponding to the quarter ending December 2018 to quarter ending December 2024 have been released. In these quarterly bulletins estimates of key labour force indicators, viz., Labour Force Participation Rate (LFPR), Worker Population Ratio (WPR), Unemployment Rate (UR), distribution of workers by broad status in employment and industry of work in the Current Weekly Status (CWS) for urban areas have been presented.

4. The annual results of PLFS are brought out in form of PLFS Annual Report covering the survey period July of a specific year to June of the following year along with the unit level survey data. Seven such Annual Reports, covering both rural and urban areas and giving estimates of all important parameters of employment and unemployment in both usual status (ps+ss) and current weekly status (CWS), have been released spanning the period July 2017 to June 2024.

5. Besides the data released with PLFS Annual Reports, unit level data of PLFS for the calendar year i.e. for survey period of January – December of a specific year, has been separately released for the calendar years 2022, 2023 and 2024.

II. Changes in PLFS

6. Considering the need for generation of high frequency labour force indicators at a further disaggregated level the sampling methodology of PLFS has been revamped from January 2025[1]. The revamped PLFS design is envisaged to address the following objectives

   - to estimate the key employment and unemployment indicators (*viz.* Worker Population Ratio, Labour Force Participation Rate, Unemployment Rate) on a monthly basis for rural and urban areas at all-India level in the Current Weekly Status (CWS)
   - to extend the coverage of the Quarterly results of PLFS to rural areas and thereby producing quarterly estimates at the country level in the Current Weekly Status (CWS)
   - to estimate employment and unemployment indicators in both usual status (ps+ss) and CWS in both rural and urban areas annually

7. Apart from the changes in the PLFS sample design, some additional items of information have also been included in the PLFS first visit schedule from January 2025 onwards.

Changes in PLFS Sampling methodology from 2025

8. The sample design of PLFS has been revamped from January 2025. The salient features of the revamped sample design are described below. The estimation procedure for generating estimates following the revamped PLFS design is given in Annexure-VI.

Rotational scheme for PLFS:

9. A rotational panel sampling design will be used in the survey. The rotational scheme will be of two years duration to accommodate the changes in the frame in the intercensal period; in the sense that the sampling frames for both rural and urban areas will remain unchanged for every two-year duration. In this rotational panel scheme, each selected household will be visited four times in four consecutive months – one with first visit schedule and other three with the revisit schedule. Monthly estimates will be generated for successive months without any break in the series starting from the fourth month, ensuring a 75% matching between two consecutive months. In addition, the quarterly estimates will be generated for successive quarters, starting from second quarter, ensuring a 50% matching between two consecutive quarters. Model based estimates will not be generated. Instead, usual design based estimates will be generated. The proposed design aims at generating monthly and quarterly estimates of level parameters of key labour force indicators (i.e., LFPR, WPR and UR) based on CWS data only. Annual estimates of level parameters will be generated based on usual status.

Rotational panel design

i. Using Pij to indicate the panel belonging to j^{th} month of the i^{th} two-year period of rotation, the scheme of rotational panel design is described below:

[1]The '*Sample Design and Estimation Procedure*' used in PLFS upto December 2024 may be perused as Appendix D in the Annual Report, PLFS: 2023-24, which is accessible at www.mospi.gov.in

ii. The rotational panel will be fixed for two years, where only one-twelfth of FSUs of annual allocation will be covered in the first month (say, Panel P11) of the first two-year panel with detail listing and canvassing of first visit schedule being undertaken in the selected households.

iii. In the second month, another one-twelfth of FSUs will be covered (say, Panel P12) for canvassing the first visit schedule while the revisit schedule will be canvassed in the selected households of Panel P11.

iv. In the third month, another new panel, say P13 consisting of one-twelfth FSUs will be surveyed with first visit schedule and revisit schedules will be canvassed in the households of the panels P11 & P12.

v. In the fourth month, households of panels P11, P12 & P13 will be surveyed with revisit schedule and those of a new panel, say P14 with one-twelfth of FSUs with first visit schedule.

vi. The monthly estimates at all-India level, separately for both rural and urban sector will be generated using full sample size with panels P11, P12, P13, & P14 from the fourth month and onwards.

vii. In the fifth month, 3 panels – P12, P13 & P14 will be surveyed with revisit schedule and the earlier panel (P11) will be replaced by a new panel (say, P15) for canvassing first visit schedule. This will continue till end of the two-year panel.

viii. In the second quarter of the first two-year panel, the quarterly estimates at state and all-India level, separately for rural and urban sector will be generated using the fourth visit sample of Panel P11, third visit sample of Panel P12, second revisit sample of Panel P13, first revisit sample of Panel P14 and P15; and the first visit sample of Panel P16.

ix. All the FSUs of the panels P11, P12, ..., P112 (each with one-twelfth of total annual FSUs of first year of the two-year period of rotation) and all the FSUs of the panels P113, P114, ..., P124 (each with one-twelfth of total annual FSUs of second year two-year period of rotation) will be selected independently before commencement of survey in the first month

x. At the end of the second year of each two-year panel, updated frame will be used for both rural and urban areas.

xi. FSUs of another set of panels P21, P22, ..., P212, P213, P214, ..., P224 selected from the updated frame will be made ready before commencement of first month of first year of the next two-year panel.

xii. In the first month of the first year of the next two-year panel, panel P21 selected from the updated frame will be introduced and the panels P122, P123 and P124 of the old frame will be surveyed.

xiii. Since major changes in the rural-urban frame occurs in the Census years, provision is to be made to generate estimates without break in the series of estimates considering panels from pre- and post-census frames.

The schema of the rotation of panel is provided in the Figure 1

Figure 1: Panels for the 2-year period: with 3 revisits of each FSU in three consecutive months

First two-year panel covering year Y1 and Y2																								Next two-year panel of Y3 & Y4		
Q1 of Y1			Q2 of Y1			Q3 of Y1			Q4 of Y1			Q1 of Y2			Q2 of Y2			Q3 of Y2			Q4 of Y2			Q1 of Y3		
M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12	M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12	M1	M2	M3
P_{11}*	P_{11}	P_{11}	P_{11}									P_{113}*	P_{113}	P_{113}	P_{113}									P_{21}*	P_{21}	P_{21}
	P_{12}*	P_{12}	P_{12}	P_{12}									P_{114}*	P_{114}	P_{114}	P_{114}									P_{22}*	P_{22}
		P_{13}*	P_{13}	P_{13}	P_{13}									P_{115}*	P_{115}	P_{115}	P_{115}									P_{23}*
			P_{14}*	P_{14}	P_{14}	P_{14}									P_{116}*	P_{116}	P_{116}	P_{116}								
				P_{15}*	P_{15}	P_{15}	P_{15}									P_{117}*	P_{117}	P_{117}	P_{117}							
					P_{16}*	P_{16}	P_{16}	P_{16}									P_{118}*	P_{118}	P_{118}	P_{118}						
						P_{17}*	P_{17}	P_{17}	P_{17}									P_{119}*	P_{119}	P_{119}	P_{119}					
							P_{18}*	P_{18}	P_{18}	P_{18}									P_{120}*	P_{120}	P_{120}	P_{120}				
								P_{19}*	P_{19}	P_{19}	P_{19}									P_{121}*	P_{121}	P_{121}	P_{121}			
									P_{110}*	P_{110}	P_{110}	P_{110}									P_{122}*	P_{122}	P_{122}	P_{122}		
										P_{111}*	P_{111}	P_{111}	P_{111}									P_{123}*	P_{123}	P_{123}	P_{123}	
											P_{112}*	P_{112}	P_{112}	P_{112}									P_{124}*	P_{124}	P_{124}	P_{124}

P_{ij}* denote panel belonging to j^{th} month of the i^{th} two-year period of rotation surveyed with first visit schedule; and
P_{ij} denote panel belonging to j^{th} month of the i^{th} two-year period of rotation surveyed with revisit schedule;
Here in the above figure i-represents two-year period of rotation, i=1 and 2 here
j-represents the months in the two-year period of rotation, j= 1,2,3,……24

10. It may be noted that one panel of sample FSUs will be in the sample for 4 consecutive months and the selected households in an FSU will be surveyed for the successive periods during which the FSU remains in the sample. Selected households will be visited 4 times for canvassing the detailed schedule of enquiry of the PLFS. These visits are termed as first visit and revisits. During the first visit, Schedule 10.4: Employment and Unemployment (First Visit) will be canvassed while Schedule 10.4: Employment and Unemployment (Revisit) will be canvassed in all revisits.

11. In this scheme, each selected household of a selected FSU will be visited four times, once in each month. To implement the rotational scheme, when a panel appears for the first time in any month with one-twelfth of annual allocation, listing and selection of households will be done in all the selected FSUs in that panel. The first visit schedule will be canvassed in the selected households. The selected FSUs/households will be revisited in the subsequent three months as the panel will remain in the sample for four months. During the revisit, listing and selection of households will not be done afresh. Only the households selected during first visit will be revisited for canvassing revisit schedule. At the time of revisit if any sample household is not found, same will be treated as casualty and a substitute household need not to be surveyed. If any sample household is found to have split, then, among the split households available in the FSU/sub-block, the household where the head/senior most member of the erstwhile household is available will be covered.

    In the rotational panel scheme followed in PLFS upto December 2024, each selected household in urban areas was visited four times, once in each quarter. Unlike the revamped PLFS design in force from January 2025, there was no provision of revisits for the rural samples.

12. **Outline of the design:** The sampling frame for urban sector is the list of Urban Frame Survey (UFS) blocks as per latest Urban Frame Survey and for rural sector, it is the list of villages as per Census 2011 updated by removing those villages which are urbanized and included in latest UFS (till the time of sample selection). Sometimes, with a view to ensuring uniformity in the size of FSUs and for operational convenience, large villages/UFS blocks are notionally divided into smaller units of more or less equal size, known as sub-units depending on a pre-defined criteria based on population in the village or number of households in the UFS block. The sector-specific criteria for sub-unit formation are as below:

    Rural Sector:

    (i) The number of SUs to be formed in the villages (with Census 2011 population of 1000 or more and except some States/UTs) is decided based on projected present population of the village. The criteria for the formation of the SUs are given below:

Projected Population of the village	Number of SUs to be formed
less than 1200	1
1200 to 2399	2
2400 to 3599	3
…	…

(ii) For rural areas of Himachal Pradesh, Sikkim, Andaman & Nicobar Islands, Ladakh, parts of Uttarakhand (except four districts Dehradun, Nainital, Haridwar and Udham Singh Nagar), Jammu and Kashmir (seven districts Poonch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban) and Idukki district of Kerala; SU is formed in a village if population as per Census 2011 is more than or equals to 500. The criteria for the number of SU to be formed are as below:

Projected Population of the village	Number of SUs to be formed
less than 600	1
600 to 1199	2
1200 to 1799	3
…	…

Urban Sector:

Sub-units are formed in the UFS blocks with number of households 250 or more. The number of SUs to be formed within the UFS blocks is decided by the following criteria:

Number of Households in UFS Block	Number of SUs to be formed
less than 250	1
250 to 499	2
500 to 749	3
…	…

Thus, the list of villages / UFS blocks / sub-units (for those villages or UFS blocks where sub-units are formed within) together formed the sampling frame for selection of the First Stage Units.

In the sampling design followed in PLFS upto December 2024, the list of latest available Urban Frame Survey (UFS) blocks was considered as the urban sampling frame for selection of the

First Stage Units. For rural areas, list of 2011 Population Census villages (Panchayat wards for Kerala) constituted the rural sampling frame for selection of the First Stage Units.

13. STRATIFICATION OF FSUs

Before stratification, all districts within a particular State/UT are arranged in decreasing order of population as per Census 2011 and the set of districts covering about 95% of urban population is considered as *'Category -1'* districts while the remaining are termed as *'Category - 2'* districts.

The primary geographical unit, called basic stratum within a state/UT separately for rural and urban sectors will be formed in the following way:

(i) Stratum Type I: Each *'Category - 1'* district in '*Group - A*' States/UTs and State Headquarter District of each of the North Eastern states excluding Assam,

(ii) Stratum Type II: All '*Category - 2*' districts belonging to '*Group - A*' states/UTs and districts of all '*Group - B*' States/UTs (except State Headquarter District of each of the North Eastern states excluding Assam) will be distributed among the NSS regions, and these NSS regions within each Sector and State/UTs will be considered as Stratum Type II.

The list of '*Group - A*' and '*Group - B*' states are provided in the Annexure-V.

Rural Sector

(i) A **Special Stratum** comprising of all the uninhabited villages as per Census 2011 is formed at All-India level.

(ii) From the remaining villages, two more strata are formed in each basic stratum:

(a) Stratum 1: Comprising of the villages within 5 Kms from the district headquarter or from a city/town with more than 5 lakh population. This stratum is not formed if there are less than 50 such villages in the Stratum.

(b) Stratum 2: Rest of the villages.

If the number of FSUs in a basic stratum is very small or sufficient number of samples is not allocated (i.e. only one sample FSU is allocated in monthly basis), in those cases the above stratification will not be done.

Urban Sector

Two or more strata will be formed in urban areas of each basic stratum with the following criteria:

(i) Each million plus city as per census 2011 will be considered as a separate stratum.

(ii) Rest of the urban areas of the district will constitute another stratum.

In the sampling design employed for PLFS upto December 2024, for rural areas each NSS region constituted the rural stratum and in urban areas, strata were formed within each NSS region on the basis of size class of towns as per Population Census 2011.

No provision of special stratum of uninhabited villages was present in the stratification followed in PLFS prior to January 2025.

14. Sub-Stratification of FSUs

In the **rural sector,** two groups of villages are formed within each stratum, except special rural stratum at all-India level, based on the following criteria:

Group	**Population of the village (as per Census 2011)**
1	less than 500
2	≥ 500

Further, the sample size for a particular rural stratum is distributed among these 2 groups in proportion to population. Let r1 and r2 be the allocations to Group 1 and Group 2 respectively. The villages within each group will be first arranged in ascending order of number of populations. For all the groups within each stratum, 'r1/12'>1 and 'r2/12'>1 will imply formation of 2 or more sub-strata in each group. Sub-strata will be demarcated in Group 1 and Group 2 respectively in such a way that each sub-stratum will comprise a group of villages (all SUs of a village considered together) of the arranged frame and have more or less equal population. If the number of FSUs in a particular group is very small or sufficient number of samples is not allocated, no sub-stratum will be formed.

In the **urban sector**, let 'u' be the sample size allocated for an urban stratum. For all strata, if 'u/12' >1, implying formation of 2 or more sub-strata, all the UFS blocks within the stratum will be first arranged in ascending order of total number of households in the UFS blocks as per urban frame. Then sub-strata will be demarcated in such a way that each sub-stratum will comprise a group of UFS blocks (all SUs of a block considered together) having more or less equal number of households. If number of blocks in a particular stratum is very small, no sub-stratum will be formed in the stratum.

The sample design used in PLFS upto December 2024, provision of sub-stratification was there in rural areas but there was no such provision of sub stratification in the urban areas.

15. Criteria for allocation of FSUs in Stratum

A criterion, in terms of population content as described below is proposed to be used for allocation of FSUs (urban blocks or villages or sub-units) in basic stratum Type -I of Category-1 districts:

FSU allocation criteria for basic stratum – I (Category- 1 Districts)		
Size Class	Sector-wise Population (as per projected population as on 1st October 2024)	Number of FSU allocated (monthly basis)
I	Less than 10 lakhs	1 FSU
II	10 lakhs to 20 lakhs	2 FSUs
III	20 lakhs to 45 lakhs	3 FSUs
IV	45 lakhs to 70 lakhs	4 FSUs
V	70 lakhs to 100 lakhs	8 FSUs
VI	More than 100 lakhs	10 FSUs

For each of the basic stratum Type – II within a State/UT, a minimum monthly sample will be allocated using the criteria based on the number of districts within that stratum. The detail of the allocation is given below.

FSU allocation criteria for Stratum – II		
Category	Number of districts in Stratum II	Number of FSU allocated (monthly basis)
I	1-5	1 FSU
II	6-10	2 FSUs
III	11 or more	3 FSUs

16. Sample Size

12,504 FSUs in the rural areas and 10,188 in the urban areas will be surveyed with first visit schedules in each year of the two-year panel. The total sample size of 22,692 FSUs to be covered in each year of the two-year panel has been allocated to State/UTs based on the criteria discussed in section 15, subject to a minimum allocation of 12 FSUs within a stratum.

Prior to the adoption of the revamped PLFS design from January 2025, the total number of FSUs surveyed in PLFS was 12,800. Out of these 12,800 FSUs, 7,016 FSUs were surveyed in rural areas and the remaining 5,784 FSUs were covered in the urban areas.

17. Selection of FSUs within Stratum / Sub-Stratum

The required number of FSUs from each of the stratum / sub-strata for each panel is selected by SRS scheme.

In the sample design followed in PLFS till December 2024, FSUs were selected by probability proportional to size with replacement (PPSWR) scheme, where size was the population of census villages (panchayat ward in case of Kerala) in rural areas and number of households in the UFS block in urban areas. The sample FSUs was drawn from stratum / sub-stratum randomly in the form of two independent sub-samples.

18. Formation of Sub-Division

It has been experienced that in some of the selected FSUs, the actual present population is significantly higher than the projected population/Census population that causes operational inconvenience for listing of all the households. In such a situation, the selected FSU is notionally sub-divided into several smaller units, called Sub-division. The criteria for determining the number of Sub-divisions to be formed in the selected rural (except areas mentioned in 12 (ii)) /urban FSU is given below.

Approx. present population of the selected SU	**Number of Sub-divisions to be formed**
less than 1500	1
1500 to 2399	2
2400 to 3599	3
3600 to 4799	4
…	…

The criteria for determining the number of Sub-divisions in rural areas mentioned in paragraph 12 (ii) are as below:

Approx. present population of the selected SU	**Number of Sub-divisions to be formed**
less than 750	1
750 to 1199	2
1200 to 1799	3
1800 to 2399	4
…	…

Only one Sub-division is selected randomly after forming the required number of Sub-divisions. Further, listing and selection of households are done in the selected Sub-division unit only.

19. Formation of Second Stage Strata (SSS)

Second Stage Strata (SSS) in each FSU will be formed based on the number of members in each household who have completed secondary level of education considering general type of education. In urban FSUs, 4 SSS will be formed, while 3 SSS will be formed in rural areas. A total of 12 households will be surveyed from each of the selected FSUs. Allocation of the sample households among the SSS and criteria for the formation of SSSs are given in the following table.

Rural			
SSS	**Composition of SSS**	**Number of persons**	**Number of households to be surveyed**
1	number of members in the household having a level of general education as secondary (10^{th} standard) or above	2 or more	4
2		1	6
3		0	2

Urban			
SSS	**Composition of SSS**	**Number of persons**	**Number of households to be surveyed**
1	number of members in the household having a level of general education as secondary (10^{th} standard) or above	3 or more	4
2		2	4
3		1	2
4		0	2

20. Selection of Households

The sample households from each SSS are selected by the SRSWOR scheme.

In the sample design followed in PLFS upto December 2024, from each selected sample FSUs, 8 households were surveyed. The criteria of formation of second stage stratification were same as mentioned in paragraph 19. The sample households from each SSS were selected by the SRSWOR scheme.

21. The salient features of the revamped sample design of PLFS adopted from January 2025 as compared to sampling methodology used in PLFS upto December 2024 have been summarized in Table 1.

Table 1: Comparison of different features between the revamped PLFS sample design adopted from January 2025 and the PLFS sample design used upto December, 2024

Aspect of the sample design	PLFS sample design followed upto December, 2024	Revamped PLFS design adopted from January 2025
Rotation panel	In the rotational panel scheme followed in PLFS upto December 2024, each selected household in urban areas was visited four times, once in each quarter, in the beginning with first visit schedule in the first quarter and thrice periodically later with revisit schedule in the following three quarters. There was no provision of revisits for the rural samples. This rotational panel scheme ensured that 75% matching of the samples surveyed between successive quarter for urban areas.	In the rotational panel scheme adopted in the revamped PLFS sample design employed from January 2025, each selected household is visited four times in four consecutive months –in the beginning with first visit schedule in the first month and other three with the revisit schedule in the following three months for both rural and urban areas. This rotational panel scheme ensures a 75% matching of the samples surveyed between two consecutive months for both rural and urban areas and 50% matching in successive quarters.
First (or Primary) Stage units (FSUs) of the multistage design	In the sampling design followed in PLFS upto December 2024, the list of latest available Urban Frame Survey (UFS) blocks was considered as the urban sampling frame for selection of the First Stage Units. For rural areas, list of 2011 Population Census villages (Panchayat wards for Kerala) along with its subsequent	With a view to ensure uniformity in the size of First Stage Units and for operational convenience, large census 2011 villages and UFS blocks are notionally divided into smaller units of more or less equal size, known as sub-units depending on a pre-defined criteria based on population in the village or number of households in the UFS block.

Table 1: Comparison of different features between the revamped PLFS sample design adopted from January 2025 and the PLFS sample design used upto December, 2024

Aspect of the sample design	PLFS sample design followed upto December, 2024	Revamped PLFS design adopted from January 2025
	revision constituted the rural sampling frame for selection of the First Stage Units.	In the revamped PLFS design employed from January 2025, the list of census 2011 villages / sub-units (for those census 2011 villages where sub-units are formed within) together formed the sampling frame for selection of the First Stage Units for rural areas. Likewise, the list of latest available UFS blocks / sub-units (for those UFS blocks where sub-units are formed within) together formed the sampling frame for selection of the First Stage Units for urban areas.
Stratification of FSUs	In the sampling design employed for PLFS upto December 2024, for rural areas each NSS region constituted the rural stratum and in urban areas, strata were formed within each NSS region on the basis of size class of towns as per Population Census 2011. No provision of special stratum of uninhabited villages was present.	In the revamped PLFS sample design, district has been made the primary geographical unit, called basic stratum within a state/UT separately for rural and urban sectors for selecting FSUs for most part of the geography covered. In the remaining parts NSS region has been made the basic stratum. For rural areas provision for stratification has been made within district / NSS region (as the case may be) based on distance of the villages within 5 Kms from the district headquarter or from a city/town

Table 1: Comparison of different features between the revamped PLFS sample design adopted from January 2025 and the PLFS sample design used upto December, 2024		
Aspect of the sample design	**PLFS sample design followed upto December, 2024**	**Revamped PLFS design adopted from January 2025**
		with more than 5 lakh population. In case of urban areas million plus cities within district / NSS region has been formed as stratum. A Special Stratum comprising of all the uninhabited villages as per Census 2011 is formed at All-India level has been incorporated in the revamped PLFS design.
Selection scheme for selecting FSUs	In the sample design followed in PLFS till December 2024, FSUs were selected by Probability Proportional to Size With Replacement (PPSWR) scheme, where size was the population of census villages (Panchayat Ward in case of Kerala) in rural areas and number of households in the UFS block in urban areas. The sample FSUs were drawn from stratum / sub-stratum randomly in the form of two independent sub-samples.	In the revamped PLFS sample design, one FSU from each of the stratum / sub-strata is selected for each month by Simple Random Sampling (SRS) scheme. No provision of drawing sample in the form of independent sub-samples is present.
Sample Size	The total number of FSUs surveyed was 12,800. Out of these 12,800 FSUs, 7,016 FSUs were surveyed in rural areas and the remaining 5,784 FSUs were covered in the urban areas.	In the revamped PLFS sample design, a total sample size of 22,692 FSUs is planned to be surveyed (12,504 FSUs in the rural areas and 10,188 in the urban areas) in each year of the two-year panel.

Table 1: Comparison of different features between the revamped PLFS sample design adopted from January 2025 and the PLFS sample design used upto December, 2024		
Aspect of the sample design	**PLFS sample design followed upto December, 2024**	**Revamped PLFS design adopted from January 2025**
	From each selected sample FSUs, 8 households were surveyed which implied an overall sample size of around (12,800 x 8) = 1,02,400 households.	A total of 12 households will be surveyed from each of the selected FSUs which implies an overall sample size of around (22,692 x 12) = 2,72,304 households. This marks a 2.65 time increase in sample households to be covered in PLFS as compared to the number of sample households used upto December, 2024.

Table 2: Allocation of sample villages and UFS blocks for PLFS

Annexure-VI

2. Estimation Procedure

2.1.Notations:

s	subscript for s^{th} stratum
t	subscript for t^{th} sub-stratum or Group x substratum
i	subscript for i^{th} FSU [SU/ Village / panchayat ward/ UFS block]
j	subscript for j^{th} second stage stratum in an FSU
k	subscript for k^{th} sample household within an FSU
D_1	total number of sub-divisions formed in the sample FSU. D_1=1, if no Sub-division is formed in the SU)
N	total number of FSUs in any rural/urban sub-stratum
n	number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-stratum and second-stage stratum
H	total number of households listed in a second-stage stratum of an FSU
h	number of households surveyed in a second-stage stratum of an FSU
x, y	observed value of characteristics *x*, *y* under estimation
$\hat{X}$, $\hat{Y}$	estimate of population total X, Y for the characteristics x, y

Let y_{stijk} be the observed value of the characteristic y for the k-th household of the j-th second stage stratum of the i-th FSU for the t-th sub-stratum of s-th stratum after aggregating person level data at household level.

For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

2.2. Formulae for Estimation of Aggregates for a stratum × sub-stratum:

2.2.1. Schedule 0.0 (Rural/Urban):

2.2.1.1. For estimating the number of households in a stratum × sub-stratum possessing a characteristic:

$\hat{Y} = \frac{N}{n} \sum_{i=1}^{n} D_1 \times y_i$

where, y_i is the total number of households possessing the characteristic y in i-th FSU.

2.2.2. Schedule 10.4: Employment and Unemployment:

2.2.2.1. For j-th second-stage stratum of t-th sub-stratum of s-th stratum:

$$\hat{Y}_{stj} = \frac{N_{st}}{n_{stj}} \sum_{i=1}^{n_{stj}} \left[D_{1sti} * \frac{H_{stij}}{h_{stij}} * \sum_{k=1}^{h_{stij}} y_{stijk} \right]$$

where n_{stj} is the number of sample FSUs with non-void j-th second-stage stratum of t-th sub-stratum of s-th stratum.

2.2.2.2. Aggregate $\hat{Y}_{st}$ is obtained by combining all the second-stage strata within t-th sub-stratum of s-th stratum:

$\hat{Y}_{st} = \sum_j \hat{Y}_{stj}$, j = 1, 2, 3 for rural and j = 1, 2, 3, 4 for urban

2.3. Overall Estimate of Aggregates for a stratum:

Overall estimate for s-th stratum ($\hat{Y}_s$) will be obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

2.4. Overall Estimate of Aggregates at District/State/UT/all-India level:

The overall estimate $\hat{Y}$ at the district / State / UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the district / State / UT / all-India.

2.5. Estimates of Ratios:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates *Y* and *X* for two characteristics *y* and *x*, respectively at the district / State / UT / all-India level.

Then, the combined ratio estimate $(\hat{R})$ of the ratio $\left(R = \frac{Y}{X}\right)$ will be obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.

2.6. Estimation of Errors:

2.6.1. Formula for estimated variance (for Rural / Urban):

2.6.1.1. The FSUs are selected by SRSWR independently for each month while the USUs are selected by SRSWOR.

(a) **Variance estimator formula for aggregate $\hat{Y}$ (for Rural/Urban)**:

$$\hat{Var}\left(\hat{Y}\right) = \sum_{S} \hat{Var}\left(\hat{Y}_s\right) = \sum_{s}\sum_{t} \hat{Var}\left(\hat{Y}_{st}\right) = \sum_{s}\sum_{t}\sum_{j} \hat{Var}\left(\hat{Y}_{stj}\right)$$

$$\hat{Var}\left(\hat{Y}_{stj}\right) = \frac{1}{n_{stj}(n_{stj}-1)} \sum_{i=1}^{n_{stj}} (N_{st}\hat{Y}_{stij} - \hat{Y}_{stj})^2 ,$$

where, j = 1, 2, 3 for rural and j = 1, 2, 3, 4 for urban

(b) **MSE estimator formula for ratio $\hat{R}$ (for Rural/Urban)**:

$$\hat{MSE}\left(\hat{R}\right) = \frac{1}{\hat{X}^2} \sum_{s}\sum_{t}\sum_{j} \hat{MSE}_{stj}\left(\hat{R}\right)$$

$$Where\ \hat{MSE}_{stj}\left(\hat{R}\right) = \frac{1}{n_{stj}(n_{stj}-1)} \sum_{1}^{n_{stj}} [N_{st}(\hat{Y}_{stij} - \hat{R}\hat{X}_{stij}) - (\hat{Y}_{stj} - \hat{R}\hat{X}_{stj})]^2$$

$$\hat{Y}_{stij} = \frac{1}{N_{st}} \times \sum_{k=1}^{h_{stij}} y_{stijk} \times n_{stj} \times multiplier$$

$$\hat{X}_{stij} = \frac{1}{N_{st}} \times \sum_{k=1}^{h_{stij}} x_{stijk} \times n_{stj} \times multiplier$$

where, j = 1, 2, 3 for rural and j = 1, 2, 3, 4 for urban

2.6.2. Estimates of Relative Standard Error (RSE):

$$\hat{RSE}\left(\hat{Y}\right) = \frac{\sqrt{\hat{Var}\left(\hat{Y}\right)}}{\hat{Y}} \times 100$$

$$\hat{RSE}\left(\hat{R}\right) = \frac{\sqrt{\hat{MSE}\left(\hat{R}\right)}}{\hat{R}} \times 100$$

3. Multipliers:

3.1. The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for different types of schedules are given below.

Schedule	Sector	Formula for multipliers
0.0	Rural / Urban	$\frac{N_{st}}{n_{st}}$
10.4	Rural / Urban	$\frac{N_{st}}{n_{stj}} * D_{1sti} * \frac{H_{stij}}{h_{stij}}$
	j = 1, 2,3 for rural j = 1, 2,3, 4 for urban	

3.2. The multiplier needs to be computed separately for generating monthly, quarterly and annual estimates.

Note:

(i) For estimating any characteristic for any domain, not specifically considered in sample design, indicator variable may be used. Rhat to be applied in the formulae of estimating MSE estimation is to be derived at the domain level.

(ii) Multipliers have to be computed on the basis of information available in the listing Schedule 0.0, irrespective of any misclassification observed between the listing Schedule and detailed enquiry Schedule.

4. Treatment for zero cases, casualty cases etc.:

4.1. While counting the number of FSUs surveyed (n_{st} or n_{stj}) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in Schedule: 0.0 will be considered. In addition, even if no household is available in the frame, that FSU will be treated as surveyed. However, if households for a particular type of schedule are available in the frame of the FSU but none of these could be surveyed then the FSU will be treated as casualty, and not as surveyed in respect of that Schedule.

4.2. *Casualty cases*: FSUs with survey code 7 as per Schedule: 0.0 are treated as casualties. In addition, an FSU, although surveyed, may have to be treated as casualty for a particular Schedule type and a particular *second stage stratum* in the following situation:

4.2.1. FSUs with survey codes 1 or 4 as per Schedule: 0.0 having number of households in the frame of j-th second stage stratum greater than 0 (i.e., H > 0) but number of households surveyed according to data file as nil (h = 0), will be considered as casualties for j-th second stage stratum.

4.2.2. *All the FSUs with survey codes 1 to 6 as per questionnaire 0.0 minus the number of casualties as identified above will be considered as the number of surveyed FSUs (n_{stj}) for that (stratum/sub-stratum) × (second stage stratum).*

5. Treatment in cases of void second-stage strata/sub-strata /strata at FSU or household level

5.1. A stratum/sub-stratum may be void because of the casualty of all the FSUs belonging to the stratum/sub-stratum.

5.2. When a stratum/sub-stratum is void, the following procedure is recommended:

Case(A): Stratum/Sub-stratum void at FSU levels (i.e. all FSUs having survey code 7):

(i) If a rural/urban sub-stratum is void, then it may be merged with the other sub-stratum of the same Group of the stratum. If for a particular group only one sub-stratum is there and only one FSU is allocated and that FSU becomes a casualty, then it will be merged with next sub-stratum group with proper size adjustment. Merged (in which void sub-stratum is merging) sub-stratum size may be calculated as:

*Merged stratum size + Merging stratum size * (per FSU size of merging sub-stratum/per FSU size of merged sub-stratum)*

Explanation of notation:

- ✓ Merging sub-stratum means void sub-stratum
- ✓ Merged sub-stratum means in which void sub-stratum is merging
- ✓ Per FSU size of a sub-stratum is the average number of households per sub-unit in urban area or average population per sub-unit in rural area.

(ii) If a rural/urban stratum (district) is void due to all FSUs being casualty, it may be excluded from the coverage of the survey. The state level estimates will be based on the estimates of districts for which estimates are available and remarks to that effect may be added in appropriate places.

Case (B): Stratum/Sub-stratum void case at second stage stratum level (i.e. all the FSUs were casualties for a particular second stage stratum):

(i) An FSU may be a casualty for a particular *second stage stratum* although survey code is not 7. If all the FSUs of a stratum/sub-stratum become casualties in this manner for a particular *second stage stratum*, the stratum/sub-stratum will become void.
